REPORT ON PUBLIC INSTRUCTION IN BOMBAY, 1912-1913.

I.—UNIVERSITY AND COLLEGIATE EDUCATION.

University.—Sanction was accorded to revised regulations for the *matriculation and B.A. examinations. At the* former science, geography and vernacular will no longer be subjects of examination, the candidate's proficiency in these being guaranteed by a certificate from his school. The B.A. course will hencefor th be limited to English and one other subject, with a distinction between pass and honours courses. Regulations for courses of study in commerce have also been adopted, but effect cannot be given to them till the promised College of Commerce is opened. With respect to medicine, agriculture and engineering, minor changes were introduced; and the rules of debate are under revision. From the Government of India were received a non-recurring grant of three lákhs and a recurring one of Rs. 45,000, the utilization of which has been under consideration; it is proposed to bring out an expert adviser from England for a short time, to organize lectures for the M.A. and other post-graduate courses, to enlarge the library, and to add buildings for various University purposes. A course of lectures on phonetics with special reference to the teaching of pronunciation to Indian students was delivered by Professor Daniel Jones of University College, London, and was well attended. Though the third inspection of the affiliated colleges by a committee appointed by the Syndicate was carried out in the course of the year the report was not presented till July 1913.

2. The number appearing for matriculation increased from 4,019 to 4,376, but the number passing fell from 2,025 to 1,436 (or 34 per cent. of the total); public opinion held the mathematical examiners mainly responsible for this rather violent fluctuation in the results. For the B.A. degree 643 appeared, of whom 410 (or 63 per cent.) passed, 6 being placed in the first class and 100 in the second. Those successful consisted of 329 Hindus, 56 Pársis, 11 Indian Christians, 10 Mahomedans, 2 Europeans or Anglo-Indians, and 2 Jews. Six were women. The relative efficiency of the colleges as measured by the percentage of successes in this examination was as follows:—Elphinstone 84, Sind 75, Gujarát 72, St. Xavier's 68, Fergusson 66, Samaldas 63, Deccan 63, Wilson 62 and Bahauddin 60. Nearly one-fifth of the candidates were ex-students, of whom only 45 per cent. were successful. The B.Sc. degree was sought by 33, of whom 22 passed. For the M.A. degree 58 candidates offered themselves in literary subjects and 19 in mathematics or science; of the former 33 and of the latter 18 were successful. Medical degrees were secured by 71, law degrees by 174, agricultural by 22, and engineering by 36.

3. **Arts Colleges.**—The total number of students increased from 3,719 to 3,941. Most colleges made additions to their staff in January to meet the demands of the new syllabus. The substitution of practical work in science for history in the first year led an unusual number of ex-students (41 per cent. of the admissions) to rejoin them. The new B.A. course is being attempted by 503, while only 47 are reported to have entered upon the new Intermediate course in science. The relative popularity of the optional subjects as shown by the number offering them is as follows:—literature 161, history 131, physics and chemistry 59, philosophy 49, mathematics 40, botany and zoology 19. The figures returned by seven colleges show 288 offering honours and 108 content with pass courses; the two remaining colleges had postponed any differentiation till after the first terminal examination. A complaint was made last year in the Legislative Council as to alleged overcrowding in some of the colleges, whereby there was scarcely even standing-room. With one exception every college repudiates the allegation, and even those known to be densely populated assert that their class-rooms could hold many more. The exception is Kolhápur. In several

cases, however, classes have had to be sub-divided; accordin[g] to a recen[t] enquiry the largest are to be found in Wilson College (252) an[d] Fergusso[n] College (226).

4. At Elphinstone College the number of admission[s] declined [from] 202 to 93, and the number on the roll from 394 to 314. [Of] this ph[e]nomenon Mr. Covernton says:—

"In the case of M.A. students the decline is due to the i[n]ability of th[e] staff to undertake much M.A. work during 1913, when their time is fully o[c]cupied by th[e] honours and pass courses of the new syllabus and the additional work involv[ed] in teachin[g] old and new syllabuses simultaneously. In the case of Intermediate studen[ts] the decline due to the large percentage of students who passed the examination [of] 1912, in p[art] to the doubt which prevailed whether science would be taught in the B.A. classes. I[n] the case of the Previous class the cause was the introduction of the new syllabus. I[t] frequently told that it was supposed that the conditions on which th[e] Principal's would be given would be harder at the Elphinstone College than [e]lsewhere, an[d] preferred to join the colleges where there was most chance of their [o]btaining the I do not regret the decline in the numbers. For some years it [has] been difficult to keep the Previous class within due bounds, and to pr[o]vide the st[u]dents with seats within hearing of the lecturer. In future I shall endeavour to [k]eep the n[u]mbers as they are this year rather than to restore them."

The decline in the proportion of Pársis noticed last ye[ar] has ce[a]sed. The Maratha scholar justified his selection by passing the Intern[e]diate in t[he] second class. With the increase in the number of subjects and cou[r]ses and th[e] additions to the staff the supply of rooms has become insufficient, [and] the b[u]ilding is inelastic. Professor Marrs thinks that there should be [no] pass course in philosophy, as it is essentially an honours subject; he believ[es], and the Principal agrees with him, that the pass student ought to have [had] *two* compulsory subjects, and that as it is he will waste a considerable amo[unt] of his time and obtain a very cheap degree. Mr. Covernton propounds a nu[mber] of yet unsolved questions on the subject of a college for women and the lin[es] it should follow. On the subject of his hostel he writes:—

"The improvements to the hostel have rendered it vastly more [c]omfortable and it is not easy to see what more can be done to the existing buildings. It appears to me that a considerable number of the students at this college either do not need a hostel, because they have near relatives in the town with whom they prefer to live; or cannot afford to live in the hostel. The fifty scholars of the college, for instance, a[re] in most cases poor, and their scholarship all goes on the tuition fees. Formerly when scholars paid no or half fees these would probably all live in the hostel. The poor student who wants to live in a hostel prefers the Wilson College, where both tuition fees and room rent are lower. If he is a student of means he prefers the St. Xavier's hostel, because its rooms are far larger and more comfortable."

Aided by a Government grant small parties from both Elphinstone and Deccan Colleges undertook tours to places of historical interest, the most arduous being that conducted by Professor Muller to Raygad.

5. At Deccan College the number on the roll increased from 234 to 236; the quarters were full, and many applications were refused. Mr. Bain does not expect any satisfactory results for some years "on account of the dislocation produced by the recent changes." There were three agricultural scholars in the college, of whom one was also a Maratha scholar. Of the Sanskrit manuscripts belonging to the college 69 were lent to 19 scholars in India, and 24 to 6 scholars out of India, Jain manuscripts being in most demand. Four[teen] were lost in the *Titanic*, of which thirteen unfortunately were different copies of the same work. The maximum period of loan to scholars outside of India has been fixed at five years, and consequently manuscripts have been recovered which had been away for as many as 22 years.

6. Gujarát College, founded in 1861, and hitherto conducted by a Board representing the Society for the Promotion of Higher Education in Gujarát, was taken over by Government from July 16th, 1912. In August Sir George Clarke laid the foundation stones of the King-Emperor George V Hall and the Sir G. Clarke Library, both being the gifts of Sir Chinubhai Madhavlal, Bart., C.I.E. The Madhavlal Ranchhodlal Science Institute was only partially ready by January 1913, when, however, a beginning was made with science work; the building with furnishing has cost Rs. 2,26,000, and Rs. 30,000 have so far been

spent on equipment. Attendan[ce] at the college rose from 385 to 414, the highest on record. The new h[ostel], the gift of Sheth Ambalal Sarabhai, was nearing completion, after which there will be accommodation for 186 residents in all. A dispensary and sick-[room], and also a cricket pavilion, are still needed.

7. At Wilson College the [attendance] rose from 685 to 762. The new hostel, towards which Govern[ment] gave Rs. 76,000, has been completed and should prove a most attractiv[e] and healthy home for a number of students; it is well lighted and ventilat[ed], all the rooms are tiled, and they are to be provided with electric light. [The] upper floor contains a residence for a professor who will act as the warden of t[he] hostel. At St. Xavier's the number rose from 541 to 614. There [was] a gr[eat] demand for rooms in the hostel, more than 140 applications being received [for] 10 vacancies. The Principal thinks that the teaching of large classes should [be] reduced, and tutorial work increased as much as possible. At Fergusson [College] the new amphitheatre and lecture rooms were opened by Lord Sydenham; the former is seated for a class of 250 but will hold about 1,600 for a meeting. The number of students rose from 787 to 953. The Board of the D. J. Sind C[ollege] has become impressed with the necessity of increasing the fac[ilities] for the study of science in Sind; the number of students declined from 276 to 230, including 26 in the engineering branch, the reason suggested being the g[reater] strictness of the matriculation examiners. At Junágadh the administrati[on] takes the keenest interest in the affairs of Bahauddin College. The hostel has been enlarged, and over 80 are now in residence; the total attendance, however, declined from 157 to 149. At Bhávnagar the new hostel for the Samal[das] College is complete, and will accommodate about 20 with a superintende[nt]; the attendance rose from 130 to 136. At Kolhápur the number attendi[ng] Rajaram College (second-grade) increased from 127 to 157. The Principal r[emarks]:—

> "There is an opinion abroad that the college examination for the first year will be much easier than the University examination has hitherto been. This opinion is justified to the extent that the professors will be the examiners, and they will examine in what they have taught. This should lead to better work, and do much to discourage cramming and to ensure better attention to lectures."

8. **Professional Colleges.**—At the College of Engineering the number of students in the University classes increased from 148 to 166; the number in the workshop and overseer classes remained 97. Twelve candidates for admission to the college for whom there was no room were admitted experimentally to the workshop where a special course was arranged for them, which it is thought will be a better preparation for the college course than would be afforded by another year in an Arts college. Out of 147 candidates sent up for various University examinations 118 passed. Considerable progress was made with the building of the new Mechanical Engineering Laboratory, and some of the equipment has arrived. There was unfortunately some sickness in the hostel, and one death from enteric; certain sanitary defects were pointed out, and steps are being taken to remove them. A former student, Mr. M. Visvesvaraya, has been appointed Dewán of Mysore. In memory of a former lecturer, Mr. B. H. Pavri, a cricket pavilion has been erected. No convenient time could be found for a geological tour, but engineering tours were undertaken to drainage works in Bombay, to railway workshops, to mills, and to the dockyard. In the workshop five appeared for the final examination of the mechanical branch, and all passed; six appeared in the electrical branch, and five passed. A Maratha was awarded a scholarship of Rs. 4, and another was granted a free studentship. For the sub-overseers' examination 34 appeared and 19 passed. The fourth grade subordinate accountants' examination was held as usual at five centres in July 1912, when 3 p[assed] out of 22.

9. The number of students in the Government Law School increased from 458 to 470. The number sent up for the two examinations increased from 615 to 704, but the number passing declined from 365 to 353. Principal Mulla and Professors Tyabji and Dande[kar] retired on the expiry of their term of office, and Professor Jayaka[r] resigned. Mr. B. N. Lang was appointed Principal, while the professorial chair[s] were filled by Mirza Ali Akbar Khan and Messrs. R. W. Desai and G. G. Nadk[arni].

II.—SECONDARY EDUCATION.

10. **Programme.**—In response to a call from the Government of India I drafted in May 1911 a programme of suggestions for the improvement and development of secondary education, which in its final form received the general approval of the Secretary of State in the course of 1912. The items were as follows:—

1. New high schools with hostels at Jalgaon and Lárkána.
2. Building and quarters for the secondary training college, Bombay.
3. Improvement of pay of assistant masters.
4. Additional headmaster in the Indian Educational Service.
5. Construction or extension of buildings for a number of schools.
6. Additional teachers for the same.
7. Playgrounds.
8. Furniture.
9. Increased contract grants for middle schools.
10. Laboratories and scientific equipment.
11. Hostels.
12. Supplementary grants to aided schools.
13. Additional Educational Inspector.
14. Inspector of Science.
15. Inspector of Drawing.
16. Development of secondary education in Sind.
17. Provision of clerks for schools.
18. Medical inspection.

Excluding the last item, the cost of which could not then be estimated, these proposals totalled up to 22 lákhs non-recurring and Rs. 5,40,000 recurring. At the present time all these items, except 4 and 13, have been taken in hand, at any rate to a certain extent; but for their completion we shall have to look to further imperial grants.

11. From the imperial grant of Rs. 11,02,000 of 1911 for non-recurring educational expenditure the following sums were transferred to the Public Works Department during 1912-1913 for buildings connected with secondary education:—

	Rs.
1. Secondary training college	1,00,000
2. Broach high school hostel	22,000
3. Satára high school hostel	21,000
4. Shikárpur, quarters for Superintendent	16,754
5. Sholápur high school, extension	20,000
6. Násik high school, construction	35,000
...	2,14,754

In March 1912 the Government of India intimated that they had made a recurring grant of Rs. 60,000 for the improvement (not multiplication) of secondary aided English schools (*i. e.*, high and other Anglo-Vernacular schools for Indians, including "English-teaching" schools), with a view mainly to the raising of the salaries of teachers. Of this amount Rs. 22,500 were allotted to the Central Division, 9,000 to the Northern, 8,100 to the Southern, and 14,400 to Sind; the remaining Rs. 6,000 being given to English-teaching schools. With these amounts supplementary grants up to one-third of the ordinary grants have been given, with instructions that two-thirds of the special grant should be spent on improving the salaries of the teachers, and one-third on the special wants of the school. These amounts were only drawn towards the end of the year, and it is too early to speak of the results. Another imperial grant was one of three lákhs for

hostels, from which the following amounts were transferred to the Public Works Department :—

	Rs.
1. Sholápur high school hostel	15,000
2. Surat high school hostel	20,000
3. Belgaum high school hostel	25,000
4. Ahmedabad high school hostel	19,750
	79,750

12. **High Schools (Boys' and Girls').**—These increased from 156 to 168, and the pupils from 44,987 to 49,480. The schools for boys increased from 129 with 41,429 pupils to 138 with 45,441 pupils; the schools for girls increased from 27 with 3,558 pupils to 30 with 4,039 pupils.

13. **Government High Schools for Boys.**—The number remained the same, twenty; the attendance increased from 7,169 to 7,389. The total in March 1911, that is before the raising of the fees, was 7,535. In the two years therefore there was a falling off of 146 only, which is more than accounted for by the opening or recognition of new private schools. In the same period the attendance in the Government middle schools increased from 1,229 to 1,295, and in the high schools for girls from 261 to 423. Thus in all the secondary schools together the net result was an increase of 82 in the two years. The fee-receipts of 1910-1911 amounted to Rs. 2,13,412 and have been taken as the basis of future calculations. The new fee-rates came into force in November 1911, and the excess received in that year amounted to Rs. 14,835. The excess received in the year 1912-1913 amounted to Rs. 49,426. Government have promised that the additional revenue shall be spent on the improvement of the schools themselves. There is therefore an amount of Rs. 64,261 in hand for additional non-recurring expenditure in the budget of 1914-1915; and it has been decided that the permanent recurring excess shall be taken as half a lákh. The exemptions allowed to each school (up to ten per cent. of its maximum) have been fairly well availed of; some details will be found in the account of individual schools. On this subject Mr. Lory writes :—

"The exemptions from fees are no doubt a great boon, and the principle is a wise one, so long as it is remembered that the object in view is to further education and not merely charity. It is not, I consider, in the interests of education to encourage boys who are never likely to get more than half way through the course. It is pitiful to see boys of the backward and depressed communities forced through the first three or four standards, never to get beyond that stage, with the result that their last state is worse than their first, as the education they have received has been of no benefit to them, and has only had the effect of making them discontented with their lot. It is for this reason that I recommend that the age of a boy should be considered in the award of free studentships, and that they should not be awarded except to boys possessing at least average attainments, who have a fair prospect of being able to complete the school course."

14. It was settled in the course of the year that headmasters in the Indian Educational Service should in future be recruited on the same terms as college professors, *viz.*, Rs. 500—50—1,000. An improvement was effected in the pay of the assistant masters with effect from July 1912, at an annual cost of Rs. 32,000; by this the minimum pay of an assistant was raised from Rs. 30 to 40, and the senior assistants who formerly drew Rs. 100 only were raised to 125. I trust that a further improvement will become feasible before long. The object in view is of course to attract to this service more of the better class of graduates, and thus to render it possible to raise the standard of instruction considerably in the high schools. Much of the material recruited at present, though well-meaning, is exceedingly feeble, and training is often thrown away on it.

15. Most of the headmasters complain bitterly of the numerous transfers and changes in their staff last year, so that this evil, which was thought to have been scotched, seems to have raised its head again. I think that the reason must have been the creation of a number of new posts of Assistant Deputy Educational Inspector and also in training colleges, causing a drain upon the staffs of the schools.

16. The new Table X of last year, showing the qualifications of teachers, has given rise to some searchings of heart. It professed to show that in Government secondary schools 153 teachers were trained and 267 untrained; while for other secondary schools 402 were trained and 2,122 untrained. For the year under report the new Table (now renumbered IX) shows in Government secondary schools 184 trained masters and 250 untrained; from which it would appear that 43 per cent. are trained against 37 per cent. in the preceding year. This table, however, without a definition of the word "trained" and of the area within which such trained teachers are to be sought, is apt to be very misleading. The table is compiled from figures supplied by the Inspectors. From the figures in my office I find that the total staff of the Government secondary schools amounts to 449. We must deduct 24 headmasters, who naturally belong to an era before any training was thought of and cannot now be subjected to it; we must also deduct 9 Shástris, 19 Persian teachers, 27 drawing-masters, 22 gymnasts, and 2 teachers connected with manual training,—79 in all. There are then 346 ordinary assistants, of whom 93 are temporary substitutes or probationers awaiting their turn for training. Deducting these we have 253 permanent ordinary assistants. Of these 167 (or 66 per cent.) are graduates and 86 are not; 121 hold the diploma of the Secondary Training College, and 68 hold the Secondary Teacher's Certificate which preceded the diploma as the recognized professional qualification. If now we take the word "trained" in its narrowest sense, as applying only to the diplomates, 121 out of 253 ordinary assistants are trained, or 47 per cent. If we treat both the diplomates and the certificated men as trained (as is actually done in the Table), then 189 out of 253 are trained, or 74 per cent. Further three Persian teachers have also secured the diploma; some of the Shástris have passed through long courses of study in Sanskrit to fit them for their profession; all the drawing-masters and gymnasts have completed courses or secured certificates which entitle them to be considered as trained in their respective spheres. If all these are included, then about 245 teachers out of 332 are trained in some sense or other, or 73 per cent. I have not the materials for a similar analysis of the figures relating to non-Government schools; but however these were treated the percentage of training would turn out much smaller.

17. Of the Government High Schools in the Southern Division Mr. Lory writes:—

"That the institution of the Secondary Teachers' College has led to a very marked improvement in the teaching methods of our schools all, I think, are agreed. With few exceptions the work of the trained teachers that I have seen has struck me as good, and in many cases as excellent. It is however highly desirable that the headmasters, who are responsible for the teaching methods employed in their schools and for instructing the probationary teachers, should be fully conversant with the work done in the college. They should be brought to regard the college as setting the standard for correct teaching and for correct management, and there should be free and constant reference from one to the other. It is also essential that the Inspectors, and to a less extent the Deputy Inspectors, who have to inspect Anglo-Vernacular Schools, should be conversant with the work of the college. I have not yet seen enough of the work of the high schools in this division to enable me to estimate the quality of the education they impart. But I find the same tendencies in evidence that exist in the schools of the Northern Division. A great evil to which I have repeatedly called attention appears to prevail in this division also, the evil of injudicious promotion. A large number of boys manage to reach the 7th standard who should have been weeded out from the 4th or 5th. Such boys act as a drag on the progress of those possessed of a better mental equipment, while the knowledge they acquire —it cannot be called education—is of no use to them or any one else. The results of the teaching of English by the direct method have been most successful. The difference between boys of the 3rd and 4th standards who have been taught by this method from the beginning, and those who have ponderously acquired a knowledge of English built up with words and phrases mechanically taught, is most marked. As these boys begin to reach the higher standards I confidently expect to see a further marked improvement in the general educational attainments. I find that the principle of encouraging extra reading has received close attention at the hands of most of the headmasters, and all the schools now have excellent boys' libraries. I have repeatedly found that it is the boys who read English books for themselves that show the greatest intelligence as well as the greatest acquaintance with the language. Most of the schools have some sort of a reading-room for the boys where a few English and Indian papers are taken in; but the system requires development..... There is probably in most schools, and especially in those in our larger towns, a great need for a closer supervision over the home life of the boys, and in particular of those who are

not living with their parents or other responsible guardians.... All are agreed as to the great educational value of hostels, moral, intellectual, and physical. But full advantage is not always taken of the opportunities they offer. A great desideratum is that they should contain recreation rooms, where the boys can meet and converse and read light literature and play indoor games and otherwise amuse themselves, and where the headmaster and other members of the staff, and any outside gentlemen authorized to visit the hostel, may meet and converse with the boys."

I cordially agree with the last remark, but as long as every educational requirement, whether of staff or of buildings, has to be ruthlessly cut down to the minimum, it is idle to propose the addition of a ping-pong room to a hostel. Only last year, I think, a certain suggestion was regarded as on the face of it ridiculous as it involved building a reading-room for boys. None of our present buildings, whether for schools or hostels, have any such provision as is suggested by Mr. Lory; and only a promise of better days to come is held out by the imperial grant in the current year for such amenities, with a view to placing education on a broader basis.

18. In Sind Mr. Pratt has done some good work at the N. J. High School especially with reference to such problems as home work, private tuition, and handwriting. The foundation stone of the Lárkána High School was laid by Lord Sydenham on the 6th February 1913; and though the site selected is not altogether satisfactory, some of the drawbacks to it are being removed. Plans have also been prepared for a new Middle School at Karáchi; but it is not very clear how this and the Lárkána School are going to be staffed without depleting the existing high schools, which are none too strongly staffed as it is. Nawábshah having been constituted a new district, a demand is springing up for a Government High School there also, for the honour of possessing which Naushahro, Thárushah, and Bhiria are competing, since Nawábshah itself is little better than a village at present.

19. I do not like to omit saying a few words about the work of each of the Government High Schools in the past year. They are, after all, institutions of some importance in their own sphere; and it is not very encouraging to them to find themselves ignored in the annual report merely for the sake of saving two or three pages of print. In the remarks that follow the figures after each name indicate the sanctioned maximum strength of the school; the attendance fluctuates a little according as former students who have failed return or not.

20. Khán Bahádur Contractor continued to be in charge of the Elphinstone High School (700). The number of pupils declined slightly from 698 to 691. At the matriculation 58 passed out of 109, one securing the first Sanskrit and two other scholarships; at the School Final 5 passed out of 10. Free studentships (whole or half) were enjoyed by 36 advanced and 19 backward boys; 2 out of 19 Mahomedans were free, the rest being well off. Popular lantern lectures on malaria were delivered by a municipal doctor.

21. At Poona High School (300), which was under Mr. Griffith, the number rose from 197 to 225, of whom 80 were helped by scholarships or free studentships or from the Poor Boys' Fund. The free students were 15 Bráhmans and 14 from the backward classes, the standard among the latter being very low. The matriculation was passed by 15 out of 27, and the School Final by 12 out of 14. The number of Mahomedans increased from 16 to 23. Organized games are provided three times a week in a field at some distance for all who wish to play; and the average attendance at games or the gymnasium was 190 out of 225. The prizes were distributed by the Honourable Mr. Claude Hill. The headmaster complains of the way in which boys come and go throughout the year, an evil which saps at the entire use of a school training.

22. At Sátára (350) Mr. M. S. Apte, the headmaster, retired at the end of the year. The total increased from 279 to 335; the Mahomedans from 26 to 38. The advanced boys secured 13 free studentships; the backward 18, of which 5½ went to Mahomedans. At the matriculation 10 out of 18 passed, and 10 out of 13 at the School Final. The playground is being extended and improved, but is too far off for the younger boys. The prizes were distributed by the Collector. A boy of the depressed classes holds the specially reserved scholarship of

Rs. 5, but is irregular in attendance and shows no progress at all. At Sholápur (now 500) the buildings were extended at a cost of over Rs. 40,000, and the staff was increased by three. The total rose from 374 to 405, but the Mahomedans declined from 49 to 40. The matriculation was passed by 9 out of 29, and the School Final by 9 out of 24. Free studentships were enjoyed by 31 advanced and 27 backward boys. The school was visited by many parents and others. Games are popular, and some of the junior boys have taken to rearing silkworms. At Násik (400) the total number increased from 418 to 424; Mahárs increased from 7 to 12, but Mahomedans declined from 9 to 4. The school had to be closed for a time on account of plague. Free studentships were awarded to 26 advanced and 17 backward boys (including one Mahomedan). The matriculation and the School Final were respectively passed by 7 out of 18. Dhulia (450) has permanently lost its former headmaster, Ráo Bahádur R. P. Godbole, now transferred to the inspectorate. The total increased from 424 to 446, of whom 34 were Mahomedans. Free studentships were awarded to 30 advanced and 29 backward boys (including 12 Mahomedans). The matriculation was passed by 22 out of 36, and the School Final by 11 out of 13. The building was improved and extended at a cost of Rs. 18,000; but owing to difficulties raised locally the grant of Rs. 4,000 for improving the playground could not be utilized. The prizes were distributed by the Collector, when over 300 guests attended. The hostel, well managed by Mr. Vidvansa, had 47 inmates, of whom 41 were Hindus and 6 Mahomedans; the average monthly food charge for the former was Rs. 9-9-0 and for the latter Rs. 8-5-0.

23. At Dhárwár (475) the number increased from 440 to 474, and many had to be refused. The Mahomedans increased from 39 to 41, but none passed this year, and two Mahomedan scholars were irregular in attendance and bad in progress. Free studentships were awarded to 35 Bráhmans, 18 Mahomedans, and 12 others. The matriculation was passed by only 15 out of 110, the School Final by 34 out of 84; some of the best boys, who had passed in all subjects at school, failed at the former, and even now the headmaster is unable to say what led to such a catastrophe. The adjoining Nawáb's compound has been acquired for Rs. 17,500 and there will now be ample space for games. Mr. Jathar acted for a short time as Educational Inspector, Mr. R. D. Nadkarni acting for him as headmaster. Out of 474 boys 264 came from outside of Dhárwár; the new hostel for 100 was opened in December and filled up rapidly, about 50 being refused admission. The inmates are 60 Bráhmans, 32 Lingáyats and 4 Mahomedans, one room being given to an assistant superintendent. The headmaster would like to have another hostel and a whole-time superintendent. At Bijápur (now 510) the number increased from 386 to 426; Mahomedans from 39 to 42, and Lingayats from 53 to 76. There was one Mahár. The examination results were the best on record, 23 out of 32 passing the matriculation and 24 out of 32 the School Final. Free studentships were awarded to 37 advanced and 27 backward boys (including 20 Mahomedans). Hockey has been introduced, and the games are well organized. At Kárwár (350) the number declined from 297 to 251, probably owing to the recognition of schools at Ankola, Kumta, and Honávar; there were 8 Mahomedans. The matriculation and the School Final were respectively passed by 12 out of 30. Free studentships were held by 25 advanced and 23 backward boys. The prizes were distributed by the Commissioner, but very few parents took any interest in the school. There were only 14 boys in the hostel. A playground has at last been secured by the acquisition of the old police lines. At Ratnágiri (290) the number increased from 225 to 238; but the hostel with accommodation for 60 or so had only 27 inmates. The playground is insufficient, there is no gymnasium, and the opportunity of getting a fine site for a new building near the hostel was lost. The matriculation was passed by 15 out of 31, and the School Final by 13 out of 20. Free studentships were awarded to 26 advanced and 14 backward boys (including one Mahomedan). The headmaster Mr. V. V. Patwardhan was transferred to Sátára at the end of the year, being replaced by Mr. A. S. Dalvi from Dhulia. The school at Belgaum (535) was under Mr. Miller. The number increased from 489 to 514, and many applications had to be refused. The matriculation was passed by 18 out of 58, and the School Final by 13 out of 28. Free studentships were awarded to 38 advanced and 33 backward boys. The manual training class continues to be popular. The boys from the 6th standard

down have all been measured, and steps are being taken to develop all the muscles of each boy, so that by the time he leaves school his body should be properly proportioned. The playground has been levelled, five pitches put down, and a pavilion erected; games are highly popular. Mr. Miller remarks that irregularity of attendance is hard to eradicate. A series of lectures by gentlemen of the town and masters was arranged; and the 7th standard was taken to Goa, an expedition which was of great educative value to these inland boys.

24. At Ahmedabad (315) the number rose from 323 to 373, a temporary increase intended to secure boarders for the new hostel which was handed over in the middle of the school year. There were 37 Mahomedans. The matriculation was passed by 25 out of 55, and the School Final by 15 out of 29. Free studentships were awarded to 15 advanced and 15 backward boys (including 9 Mahomedans). The school won two shields and a cup for sports, and a cricket cup. Dr. B. H. Nanávatti gave a course of lectures in First Aid for the benefit of the teachers and senior students in connection with the new curriculum. At Surat (300) the number increased from 275 to 302, of whom 28 were Mahomedans. The matriculation was passed by 16 out of 49, and the School Final by 10 out of 26. No applicants for free studentships were rejected, but those reserved for the backward classes are not fully utilized. After an interval of many years a prize distribution was held by the Collector. The school was visited by about 100 parents and citizens out of 175 invited. Like others the headmaster complains of the difficulty of securing peons and hamáls on the low rates of pay sanctioned by Government, and mentions the case of a peon on Rs. 8 who joined a mill at Nágpur on Rs. 45, or five more than the starting-pay of a graduate here. The headmaster further remarks :—

"Secondary education has in no way suffered by the raising of fees; not only is the Government institution fuller in numbers, but other institutions are equally prosperous. Buildings are springing up, furniture of modern type is being added, salaries of staffs are being raised, and attempts are being made to give permanency to the staff by schemes of insurance policies."

At Nadiád (350) the number remained stationary at 312. Free studentships were awarded to 11 out of 15 advanced applicants, 10 out of 13 backward Hindus, and 5 out of 5 Mahomedans. Complaint is made of the irregular attendance of 22 Tálukdár students shifted here in January 1912 from A'mand; not being accustomed to discipline they were in the habit of absenting themselves on frivolous pretexts. The matriculation was passed by 17 out of 47, and the School Final by 16 out of 34. Of the total number 238 boys attend the cricket-fields and 59 the gymnasium. The hostel had 71 inmates. Prizes were distributed by the Commissioner; two parents' gatherings were but thinly attended. The Assistant Surgeon examined the eyes of 285 boys and found only 109 normal. The boys' library is freely used, and the President of the Dahi Laxmi Library in the town has arranged to set apart books suitable for boys and to issue them free. At Broach (380) the number increased from 334 to 350; the Mahomedans from 37 to 48. Free studentships were awarded to 21 advanced boys, 14 Mahomedans and 10 others. The matriculation was passed by 15 out of 46, the School Final by 7 out of 24. A gathering was held of parents and guardians. About 200 boys play cricket; and the Past *v.* Present match was so popular that parents of the Present played for the Past, one of them being an old man of 60. The report does not say who won. At Godhra (250) the total remained 226; Mahomedans increased from 25 to 31. The matriculation was passed by 13 out of 20, an unusually good result, and the School Final by 8 out of 17. The hostel had 62 inmates. Boys have begun to take full advantage of the library; and a special hour is provided in the timetable when any boy may be called on to reproduce what he has read during the week. Attendance at the playground is no longer regarded as a burden; eleven teams may be seen playing each evening, and the boys have improved in physique and brightness. Prizes were distributed by the Commissioner, and there was a fairly good attendance of parents. Advanced boys have been given 9½ free studentships, Mahomedans 2½ and others 5. At Thána (362) the number has increased from 282 to 310, of whom only 116 reside in the town: there were 2 Mahomedans and 2 Chámbhárs. The matriculation was passed by 7 out of 14, the School Final by 8 out of 8.

Free studentships were awarded to 26 advanced and 15 backward boys; no Mahomedans applied.

25. At Karáchi (579) the number declined from 618 to 515, a phenomenon attributed to greater strictness in admission and promotion. Free studentships were given to 28 advanced and 21 backward boys (including 3 Mahomedans); Mr. Pratt considers most of them to be wasted generosity. He remarks that owing to the low salaries offered a few of the bottom posts have to be given to men who are quite out of place in a high school. He also finds the conditions in the school such that it is almost unreasonable to expect boys to write well; several classes have no desks whatever and hold their papers on their knees, whilst those classes which are provided with desks are so crowded that there is no room for the boy to put his arms properly on the desk. Till Mr. Pratt came the school had been without a European headmaster for five years; and during that time neither the acting headmasters nor the Educational Inspectors availed themselves of repeated opportunities for securing grants for suitable furniture. At Hyderabad (273) the total rose from 239 to 263. Mahomedans increased from 36 to 41; two passed the School Final, and one the matriculation as well. Altogether 6 out of 34 passed the latter, and 15 out of 32 the former. Free studentships were awarded to 12 Hindus and 10 Mahomedans. The school building, long since condemned, remained unimproved. In the hostel a new block was opened, but "the new kitchens and diningroom were not availed of on account of bad stink coming from the Training College latrines standing on the windward side." There were 50 visitors to the school during the year. The library is said to be old and obsolete, and more money is said to be wanted for prizes. At Shikárpur (386) the number declined from 333 to 309, owing partly to increased fees, and partly to the Hopeful Academy being recognized as a high school. The matriculation was passed by 11 out of 49, one boy heading the list in Sind; and the School Final by 12 out of 41. Of the free studentships 12¼ were awarded to advanced boys, 12 to Mahomedans and 3½ to Bráhmans. Nearly 1,600 books were issued to boys in the course of the year.

26. **Municipal High Schools for Boys.**—These remained four in number; the pupils decreased from 1,041 to 1,020. At Pandharpur progress on the whole was not satisfactory. The staff and equipment of the Edward Memorial High School at Kaira were unsatisfactory, and its work poor. The Sukkur School requires better equipment, and trained teachers with adequate knowledge of their subjects and of English. The fourth school is at Hubli.

27. **Native States High Schools for Boys.**—The number of schools decreased from 31 to 30, and that of pupils from 8,155 to 8,050. In the Central Division there was a slight rise in all three schools,—Bhor, Phaltan and Akalkot; at Bhor one pupil was a girl. Mr. Lory saw nothing of the schools in the Southern Division. There was a slight rise in attendance in the Northern Division; and a boy from Nándod won the science prize at matriculation. In Káthiáwád the best schools are said to be the Bhávnágar Alfred, the Rájkot Alfred, the Junágad Bahádurkhánji, the Jámnagar, and the Wadhwán Daji Raj High Schools.

28. **Aided Anglo-Vernacular High Schools for Boys.**—The number of schools increased from 40 to 46, and the number of pupils from 12,652 to 16,208. At the Sir J. J. Pársi Benevolent Institution 305 children of poor parents are provided with a free meal every working day. Two trips were undertaken by the Esplanade High School, one to Kárla, Lonávla, and Khandála, and the other to Elephanta and Uran; about 100 boys went on each. At the Robert Money School all writing is done in ink, and no scribbling in pencil is allowed. The attendance at the New English School, Poona, rose from 993 to 1,484. The Superintendent of the Nutan Maráthi Vidyálaya passed some time in the Secondary Training College to study its methods. The Poona boys are reported to have behaved admirably at the Athletic Association's sports in 1912. Mr. Lory says nothing special of the schools in his division. In the Northern Division the L. P. Mission School at Surat is praised for trying to make the boys realize that they were members of a corporate body. In the Broach Union School the range and quality of education were far below the required standard in consequence of inefficient teaching and injudicious promotions. In Sind the

New High School at Karáchi is making satisfactory progress, and the C. M. S. school is doing good work in an unostentatious manner. The Inspector was impressed by the boys' library and the drill at the Nava Vidyalaya, Hyderabad; the new building was nearly completed when unfortunately the tower fell.

29. **Unaided Anglo-Vernacular High Schools for Boys.**—The number of schools increased from 17 to 22, and the number of pupils from 7,908 to 8,570. The Gibb high school at Kumta (Kánara) is well equipped, and has a hostel for 90 under construction. This and the Anant Shivaji Desai high school at Málvan (Ratnágiri) have been recently founded, and owe their existence almost entirely to the munificence of private gentlemen. The Proprietary high school at Ahmedabad is a huge collection of classes in which the attendance increased to 1,286.

30. **Girls' High Schools (Anglo-Vernacular).**—The number of schools has increased from 11 to 14, and the number of pupils from 1,345 to 1,799. The attendance at the Poona high school for Indian girls increased from 206 to 253. There are no schools of this class in the Southern Division; but of 7,251 students receiving secondary education 38 were girls. In Káthiáwád H. H. the Thakore Saheb of Gondal has raised the Monghibai middle school to the status of a high school, the first for girls in that province; but of 230 pupils only 6 were in the higher stage.

31. **Middle Schools (Boys' and Girls').**—These increased from 403 to 420, and the pupils from 29,614 to 30,664. The schools for boys increased from 351 with 26,145 pupils to 371 with 27,075 pupils; the schools for girls decreased from 52 to 49, but the pupils increased from 3,469 to 3,589. Amongst the new schools is the Government House Establishment school at Ganesh Khind. Attendance at the Elphinstone middle school (650) declined slightly from 532 to 581. As the number at the Poona Camp Government English school (200) rose from 130 to 167, it does not seem to have been affected by the new Parsi school; and in spite of the drawback of having neither compound nor playing field the school does well on the physical side. The Anglo-Urdu class at Násik is doing only moderately well, and is in need of a better teacher. The rates of fees charged in the Government high school at Sholápur are also charged in the New English school there without affecting its attendance. From the Southern Division Mr. Lory writes that little is known about the Native States middle schools, but that their condition as a whole must be far from satisfactory if the qualifications of the teachers are taken as a guide. There is a constant migration between these schools and those in the neighbouring British districts, so that any shortcomings in the former naturally re-act upon the latter, as well as on the State high schools. The Government middle school at Ahmedabad (250) has no playground either, but managed to win a cricket cup and a sports cup; the number rose from 255 to 270. At the Government middle school at Surat (280) there were 277 boys instead of 279. Very few of the aided schools in the Northern Division can be called satisfactory. The Rájkot middle school has 455 pupils, which the Educational Officer ventures to think too many; two of them were girls. In Sind a Local Board Anglo-Vernacular school was opened at Mithi (Thar and Párkar), which has 36 pupils and shows signs of progress. Several of the Sind municipalities have recently obtained permission to increase the number and improve the pay of the teachers in their Anglo-Vernacular schools. The average fee in the Sind middle schools has increased from Rs. 13-4-0 in 1910-11 to Rs. 15-1-0 in 1912-13; some of the aided schools charge the full enhanced fee as in Government schools. In the girls' schools as a rule no fees are charged, and consequently the raising of the maximum limit of the grant from one-third to one-half of the expenditure will relieve the managers considerably. An English class has been opened experimentally at the practising school in Hyderabad, and a teacher appointed for two years.

32. Mr. Lory makes the following general remarks on the Southern Division :—

"I have been much struck by the great and increasing demand for English education, and especially for the establishment of high schools. Naturally this demand gives birth to some institutions of a quality such as does not justify their existence. The qualifications

of the teachers are in many cases inferior, but I find that the number of graduates employed is considerable. It would appear that it is possible to secure their services on lower terms than in Gujarát. The chief need is for more trained teachers. Whatever may be the case with the high schools, there is little doubt that the education given in the smaller (middle) schools is as a rule unsatisfactory. In the course of my inspection of certain Government high schools I have been forcibly struck by the marked inferiority of the boys who had come from private feeder schools to those who had been in the high schools from the beginning. I hope that the supplementary grants will enable the schools to secure the services of trained teachers. Another need is the establishment of a pension fund, which will make service a thing of a more permanent nature. The tendency for municipalities to provide for English education seems to be extending. It is open to serious question whether it is desirable that local taxation should be devoted to secondary education until all the needs of primary have been satisfied. It cannot be said that the latter condition is generally fulfilled in the case of the municipalities."

In the Northern Division the defects commonly noticed are want of sufficient accommodation, inadequacy of equipment and sometimes of staff, and low salaries paid to teachers. As the teachers are poorly paid and as they have no prospects for promotion, qualified men hardly care to take up service, and, even if they do, have no permanent interest in the institutions, and are always ready to throw up jobs as soon as they find better jobs elsewhere. In the Sind schools Mr. Hesketh thinks that mathematics is probably the weakest subject, and lays the blame for this on the mode in which arithmetic is taught in the primary schools. The Sind schools are fairly well housed, but the equipment leaves much to be desired, and one great need of most is the provision of libraries. Even if the schools could afford to employ graduates, there are not enough in Sind to supply the demand; the schools are thus compelled to fall back upon non-graduates, and it is essential that these should at least be trained. Mr. Hesketh has suggested that a secondary training class be opened at Hyderabad to facilitate matters. At present the quality of instruction in many of the schools is very poor, and it is pitiful to see some of the travesties of the direct method; the beginners are usually handed over to the junior teachers, who know little of English and less of teaching. It appears that at least 50 per cent. of the boys drop out before reaching the 7th standard, but it has usually been supposed that the smattering of English acquired would prove useful to a boy in after-life. Perhaps it does in the case of boys living in towns where English is freely spoken, but for those who return to their villages the case is different. The Inspector writes:—

"At an enquiry held into the condition of the Lárkána Madressa we had occasion to call as witnesses former pupils of the institution, and we found that as a rule a boy who had been learning English for four years or more, and had then spent a year or two in his village, was unable either to speak or to understand the language. This result shows the need for caution in extending English education in rural areas."

33. On the subject of Anglo-Vernacular schools for girls, Miss Corkery writes:—

"All the high schools aim at preparing girls for a University career, and with few exceptions follow the curriculum sanctioned for boys' schools. There has been no appreciable improvement in the staffing, and managers complain of their inability to obtain trained teachers. . . . With the exception of the Girton High School, which maintains 9 standards and follows a curriculum more approximating to the English-teaching course, the majority of girls leave school equipped with a poor colloquial knowledge of English. A few of the managers are trying to improve their school libraries and to encourage home reading; some of the Parsi girls are responding to the movement. Probably the ordinary English story book does not appeal to the interest of Hindu girls as it does to the Parsis. Of the 14 schools which teach a second language, six provide for French only, three for Sanskrit only, and one for Persian only, while two allow a choice between French and Persian, and the remaining two allow either Sanskrit or French. There is a prevalent idea that it is easier to score marks in French. . . . . With the exception of three mission schools no advance has been made in the physical side of the girls' education. The provision of central playgrounds is a question that should be taken up by the managers."

From Sind Miss Brooke reports that the New Anglo-Vernacular Girls' School at Hyderabad is doing excellent work.

"Gurumukhi is taught as a second language only in the 4th standard, and as a means of introduction to the Sikh scriptures. Hence the junior classes, not burdened with the learning of two separate scripts as in most girls' schools in Sind, make more rapid

progress. The girls in the 4th standard pick up the script very quickly, and no time is wasted . . . . . The Anglo-Vernacular class at the Training College for Women, Hyderabad, has made a good beginning, there being already 28 girls on the register. The experiment has also benefited the Training College indirectly, as I hoped it would. The wife of Mr. Hamidali, Collector at Nawabshah, has promised her personal influence with Mahomedans of the better class to send their girls here . . . . . When the school develops I should like to see a well-bred Mahomedan lady as one of the assistants. Mahomedan education for girls of the better class will not develop except by such special means, strict purdah classes and a staff composed entirely of English and Mahomedan ladies."

34. **Schools for Europeans and Anglo-Indians.**—The number of European schools remained 43; attendance increased from 3,957 to 4,055, of whom 3,625 were Europeans and Anglo-Indians. Adding 565 children of the same classes in English-teaching schools, the total number of European and Anglo-Indian children enrolled stands at 4,190, or 16 per cent. of the population. Of the 43 schools, 9 are managed by Roman Catholics, and 34 (including 12 railway schools) by Protestant bodies. The total expenditure on European and special schools amounted to Rs. 5,30,324, of which 31 per cent. came from Provincial Revenues and 37 per cent. from subscriptions, endowments, etc. The fees averaged about Rs. 3-2 per mensem. A Durbar grant of Rs. 40,000 was made available in the course of the year with retrospective effect from the 1st of April 1912. From this sum Rs. 23,900 were allotted for reassessment of grants with a view to improving the pay of the teachers; Rs. 4,210 were devoted to the reduction of fees for poor children; Rs. 9,519 to the relief of 91 destitute boarders and 66 day scholars who could not pay fees; Rs. 480 to scholarships; and Rs. 20 were spent on furniture, leaving a balance of Rs. 1,871 unspent. Thus practically the whole amount was spent on the two most urgent needs, improvement in the pay and quality of the teaching staff, and relief of the poor and destitute. But it is calculated that to satisfy all demands on behalf of poor and destitute children a further sum of Rs. 8,000 is required; whilst to staff the schools with adequately qualified and contented teachers would mean increasing the annual expenditure by Rs. 1,20,000. Mr. Marrs writes:—

"I agree with my predecessors that the new code has produced good results and sensible methods. It encourages a thorough grounding in the three R's which will afford an education more or less complete in itself and will also serve as a foundation for more advanced study. The Simla Conference, however, decided that the instruction given in European schools should be more practical. It is thought that the criticisms of that Conference apply in part only to the Bombay course of instruction . . . . . The Bombay European schools on the whole are by no means bad. Of St. Mary's high school, Poona, it was reported that the children were getting an education (in the widest sense) which was equal, if not superior, to that of a good high school in England, and that they were getting it at about one-tenth of the cost. The Kindergarten system is admirable in many schools. There are many teachers who can make object lessons a reality; and the courses of instruction in English and Mathematics are well planned. That, however, elementary science is neglected, and there is insufficient training of the intellect through hand and eye, cannot be denied. At the same time the code is hardly responsible for these defects. The majority of the heads of schools have secured good work in the face of difficulties. There is a very fair but not adequate supply of women teachers; 80 per cent. of the assistant teachers are women, and the average pay of lay female assistants amounts to Rs. 57 per mensem only. A very large proportion of them have received some training, and are competent to teach lower classes; but through the limited supply the schools have to depend largely on the local product for their teachers, as a salary of Rs. 50 or 60 is not willingly accepted except by those who reside with their parents. Railway schools appear to find the greatest difficulty in recruiting, although the pay in these schools is improving, and advantages in the shape of free quarters and railway concessions are usually offered. When more highly educated women are required for higher classes in high schools, then greater difficulty is experienced, and the difficulty is in a large number of cases met by the appointment of missionaries. The greatest problem of all is that of securing and retaining well qualified men teachers. The profession does not attract members of the domiciled community, the average salary of lay assistants not exceeding Rs. 103 per mensem. There is a growing tendency on the part of the best schools to import men from home, and one school is wholly staffed by British graduates. These men will not settle down, as a rule, for life as assistant masters in India, but some of them may be retained as headmasters. . . . . The number of teachers returned as trained has increased from 139 to 179. The increase is partly accounted for by the number of passes in the Secondary Teachers' Certificate Examination, and partly by a different system of recording qualifications. Hitherto Jesuit fathers who have passed through a secular course of instruction equivalent to the course for a degree, and who have been trained

at home in the theory and art of teaching have been included amongst untrained teachers. I was not satisfied with this classification, and such teachers have been entered as trained even though they can produce no certificates."

The matriculation has ceased to exercise any great influence on European schools, and only 25 pupils appeared for it. Its place has been taken by the European high school and the Cambridge Senior Local examinations; 20 out of 49 passed the former, and 22 out of 43 the latter. Neither examination, however, provides for any record of the candidate's character and school work. For the scholarship examinations there is satisfactory competition. Of the 43 schools 18 have hostels attached, and due attention is paid to the health and morals of the boarders. There is also an improvement in libraries. The condition of day scholars is not so satisfactory, and children are frequently kept away from school on pretexts which are more or less trivial. Of one school it is reported that a child has occasionally to stay away because the dhobi has annexed its clothing in lieu of wages. Some parents on account of poverty make constant demands on the children's time; others fail to realize the harm done by chronic irregularity of attendance. Among the latter the parents of children in railway schools are perhaps the greatest offenders. In the larger schools games receive adequate attention, and cadet corps flourish; but of an up-country school it was reported that "the physical education of the boys consists of a game remotely resembling cricket, varied by throwing stones at fruit-trees." The quality of the furniture in these schools is gradually improving. A large number of boys are absorbed by the railways, and Bombay headmasters report that they have little difficulty in obtaining posts in private firms for boys of character.

35. The number of English-teaching schools was 38 against 39 last year, but the attendance increased from 8,095 to 8,171, of whom 565 were Europeans and Anglo-Indians and 4,918 were Indian Christians. Mr. Marrs writes of them:—

"The schools are on the whole more cheaply run than the European schools, and with a few exceptions are less efficient. The average annual cost of educating a pupil in the high schools is Rs. 133 in the case of European schools, and 83 in the case of English-teaching schools. They are also less liberally aided by Government, the cost to Government being 20 per cent. of the total cost for each pupil in the high schools and 38 per cent. in the case of European high schools. Rs. 6,000 were allotted for the improvement of these schools last year, two-thirds going to increase teachers' salaries and one-third to meet other needs; but it is doubtful whether it has done much good, though it has not been wasted. The highest amount any one school received was Rs. 515, and the expenditure of this school was Rs. 16,550. The grant was not finally sanctioned till the last week of the year. Of the 379 teachers as many as 261 were untrained, and 353 possessed no University degree. Such success as these schools attain is usually in proportion to the number of religious teachers on the staff. They do not, as a rule, pay salaries sufficient to attract highly qualified lay teachers. This is most unfortunate as the teaching, particularly in the junior classes, is most difficult, the majority of the pupils having to study in a language which is not known to them, and the teachers being unfamiliar with the vernaculars of all their pupils. This state of things too frequently means undue emphasis on the memory and mechanical methods, the unsoundness of which is discoverable in the number of 'dull and backward pupils.' The obvious remedy, an Anglo-Vernacular system, is not applicable to more than half of the pupils, the Indian Christians, as instruction in Goanese and Konkani is not available, and the East Indians speak a debased Marathi. Of Parsis 828 attend these schools, which, for various reasons, are not unsuitable for all; but it seems a pity that there should be 2,688 Indians undergoing a type of education that for perhaps 90 per cent. of them is a subversion of natural laws, especially when there are Anglo-Vernacular schools in the same locality. The attraction to the Indian is that a little English can be quickly learnt, and that the discipline has a high reputation. The code of instruction leads up to the matriculation examination as it stood before revision. This examination is the most popular in English-teaching schools, and 80 passed last time against 17 in the School Final. Candidates are rarely, if ever, sent up for the European high school examination. The code of instruction is out of date, being very much on the same lines as the code for Anglo-Vernacular schools prior to the last revision."

36. I extract a few remarks also from Miss Corkery's report on girls' schools of this class:—

"The Convent schools at Bándra are fortunate in being almost entirely staffed by the nuns, who devote themselves whole-heartedly to the interests of their pupils. A pleasing feature of the year's work was the increasing interest taken by the pupils in gardening;

as a large number of them reside in the hostel they have been able to spend their recreation time profitably, and at the same time have healthy work in the fresh air. A fair-sized plot has been allotted to each of the higher standards, and there is keen rivalry as to which set of girls can produce the best collection of flowers. . . . With reference to the teaching of special subjects the most decided advance has been made with regard to English, supplementary reading being encouraged in all the schools. The libraries in most are receiving attention and are being brought up to date. Geography is one of the weak points. Mathematics in the higher forms is usually in the hands of a 'pandit'. There has been little improvement in the method of teaching French, which is still treated as a dead language. An exception to this is to be noted in the Girgaum Girls' high school, where the language is taught on modern lines by a lady graduate of an English University who holds the Cambridge Teacher's diploma. The same lady is responsible for the higher mathematics in this school, and it is a pleasure to see the girls responsive to the intelligent methods of reasoning she adopts. I broached the subject of holiday courses for teachers in Bombay, but found the idea does not commend itself to the teachers themselves. They reason that the school hours are so trying that it is essential they should utilize the vacation for recuperating lost vitality. If the managers of all the European and English-teaching schools will agree to observing one half holiday in the middle of the week, perhaps it will be found practicable to arrange a series of lectures on simple pedagogic science and school management, interspersed with criticism and model lessons."

37. **Grants-in-aid.**—The allotment for 1912-13 for grants-in-aid to secondary schools amounted to Rs. 3,72,000; in addition to which Rs. 40,000 (Durbar grant) were distributed to European schools, and Rs. 60,000 (Imperial grant) to Anglo-Vernacular and English-teaching schools. Nine new schools were brought upon the aided list, which now includes 254 in all, 180 being Anglo-Vernacular schools.

III.—PRIMARY EDUCATION.

38. **Primary Schools for Boys.**—Schools increased from 11,609 to 12,169, and pupils from 672,391 to 723,815. All the divisions and also Káthiáwád contributed to the increase in both respects; but in Aden the schools decreased from 37 to 33, and the pupils from 1,612 to 1,548. In respect of the number of schools the increase was mainly under Local Boards.

39. **Local Board Schools (Boys').**—These increased from 6,251 to 6,610 and the pupils from 338,055 to 367,796. Excluding the Southern Division, from which no report has been received, there were 4,777 schools; of these 38 per cent. were held in Local Board buildings, 22 per cent. in rented buildings, and 40 per cent. in temples, chávadis, dharmashálas, or other rent-free buildings. In the budget for the year Rs. 75,000 were provided for opening new schools. With this amount provision was made for 218 new schools in the Central Division, 39 in the Northern, 92 in the Southern, and 38 in Sind—387 in all; and the balance of Rs. 5,000 was given as an additional grant on account of the central school for Bhils at Dohad, payable until the Panch Mahálś Board is able to make good the deficit in its educational budget. There was also a budget provision of Rs. 75,000 for giving trained masters a further instalment of their pay according to the Code, to which Rs. 25,000 were added from the Durbar grant of Rs. 6,70,000. The untrained masters in Sind received a further sum of Rs. 6,500 for improvement in their pay.

40. Various questions arising out of the distinction made in 1911 between rural and full primary schools were disposed of in a Resolution issued in June 1912; the standards for Maráthi rural schools were sanctioned at the same time, and those for Gujaráti and Kánarese rural schools in December. The standards for Maráthi full primary schools were sanctioned in March 1913; the Kánarese standards in August 1913; and the Gujaráti standards are at the time of writing before Government for sanction. In the revised curricula the use of the Agricultural Readers has been discontinued.

41. In the Central Division the number of pupils declined in Ahmednagar from 17,486 to 16,102 owing to famine. In about 760 of the school buildings low-caste pupils are not allowed to sit. In the Poona District Ráo Bahádur D. H. Badadhe handed over to the Board a new school house at Kodit Budruk, constructed at a cost of Rs. 5,000 with furniture and other equipment. The efforts of the villagers of Gunjalwadi (Junnar) and Ghanegaon (Bársi), who have built the school houses entirely at their own cost, deserve special mention. The people of a Poona village told the inspecting officer in confidence that they did not provide a decent house for the school for fear that Government would then not construct a new school house for them. By way of experiment three cheap buildings have been erected by Local Board agency in Sátára at a cost of Rs. 450 each, providing space for about 40 children and a room for furniture. Mr. G. V. Joglekar, a District Deputy Collector, in East Khándesh, noticing the enthusiasm of the villagers for school houses, collected over a lákh of rupees from such as willingly came forward, with part of which he proposes to build cheap houses for small village schools. From Sholápur Mr. Brahme reported that the substitution of mud for chunam sanctioned in the construction of some of the village school buildings does not promise satisfactory results. The saving in cost is often comparatively small, while the weakening of the building is disproportionately great. In the case of a building for 50 boys the difference in cost was only Rs. 100, and the villagers voluntarily contributed one-fourth of the excess to prevent mud being used. In another case a dhaba school house was constructed by Local Board agency with black earth at a cost of Rs. 500, and it was feared that the building would come down at the first shower of rain; steps are being taken to reconstruct the whole at the cost of the contractor. A building for 60 boys took five years to construct and yet is not satisfactory. On the whole it seems that dhaba buildings are less costly and equally well built if entrusted to a village agency from the outset. In the last four years 807 new schools have been opened in this division from the special grants. A few have had to be closed for bad attendance, chiefly due to famine. Of the rest it is too early to say how many have really taken root; for it is when the children of the

leading men of the village, who asked for the school, have completed their course that the attendance begins to dwindle and it becomes necessary to close or transfer the school. Although there is still a demand for a few more schools in almost every district, the general demand appears to be satisfied for the present. The percentage of cess-payers' children in Local Board schools was 66·3.

42. From the Southern Division no report has been received. In the Northern the percentage of cess-payers' children was 64. Though 5 schools were added in Broach, the total number of pupils in that district declined by 178; this is attributed chiefly to the high wages which children can earn by picking cotton instead of attending school. Ráo Sáheb Shastri reports from Surat that persistent demands for a full primary school are made by small but advanced villages, the demand being usually accompanied by an offer to construct a suitable building or to provide an extension to the existing building. In Sind there is a difference of opinion as to the prospects of new schools. In the Lárkána district there is said to be a demand for more, due to the growing unpopularity of mulla schools; in Sukkur the success of the new schools in face of the general distress is considered to witness to the appreciation of primary education by the people. On the other hand Mr. Merani considers that the limit of voluntary desire for education has been reached in Nawabshah. On the whole Mr. Hesketh is disposed to think that extension is possible in most of the districts, that the inspecting officers can do much to foster the desire for education, and that they could do more if they had fewer schools to inspect.

43. On the subject of buildings Mr. Hesketh writes:—

"I am indebted to Major Murphy, I. M. S., Deputy Sanitary Commissioner, Sind Registration District, for a criticism of existing buildings from the hygienic point of view which he made in 1911. With his assistance four standard plans of schools to accommodate 40, 40—75, 75—120, and 120—200 boys respectively have been prepared and now await the sanction of Government. One of the main points to which he drew attention was the lighting of the school buildings, and he showed how the amount of light which enters by a window can be very largely increased if the walls are cut away at an angle inside instead of being straight. After consulting him I have given instructions that in future the interior of school buildings should be whitewashed, and not tinted with the garish blue colour beloved by Local Fund overseers. . . . One question in connection with school buildings on which all the Deputies are agreed is the necessity of providing quarters for the head-masters at least. I am disposed to agree, as the possession of a comparatively dignified residence will increase the respect in which the master is held by the villagers, and, what is more important, will tend to keep him out of quarrels. There appears to be a willingness on the part of some of the wealthier Zemindars and others to contribute towards the cost of school buildings. . . . I have received several complaints of masters who are alleged to have hung about the village well when the women were drawing water, and I gather that it is better that a school should not be too near the village well."

The equipment of a Sind school at present consists of backless benches, usually too high, arranged round the sides of the room; but Mr. Hesketh has decided that backs should be supplied. He adds:—

"I am also trying to deal with the subject of school pictures. I want a series showing important places in Sind, such as the Karáchi harbour, the Sukkur bridge, the Mirs' tombs at Hyderabad, and so on. As an experiment I am having a photograph reproduced showing a steamer alongside the wharf with bags of grain ready for loading. . . . I have been able to provide funds in most of the districts to start libraries containing interesting books for boys, with a view to encouraging reading among the pupils and ex-pupils of the Local Board schools. I have asked the Principal of the Training College and the Deputies to meet in December to draw up a comprehensive list of suitable books, laying stress on the fact that the books must be interesting. Instructive books can come later when a taste for reading has been cultivated. Sindhi is unfortunately poor in literature, and it may be necessary to offer rewards to authors of suitable books."

44. **Municipal Schools (Boys').**—The number of these increased from 718 with 90,554 pupils to 743 with 103,964 pupils. In Bombay City there were 13 new schools, 6 being Maráthi, 2 Gujaráti, and 5 Urdu; there has been some improvement in the accommodation, and in the Urdu schools there is a rise in the number of pupils in the higher stages. Though no sports were held this year at Ahmednagar during the Shimga holidays, it is reported that the streets were free from boys wandering about and indulging in obscenity. The Chopda municipality in East Khándesh is said to be thoroughly incompetent to manage

its schools. In Sind the cost of educating each pupil in a municipal school is much higher than in the Presidency, being Rs. 18 at Karáchi, 15 at Hyderabad, and 10·3 at Shikárpur, as against 12·3 at Poona, 8·4 at Dhárwár, and 7·6 at Ahmedabad.

45. From the Durbar grant of Rs. 6,70,000 the sum of Rs. 1,29,337 was distributed to the municipalities to bring the Government grant up to one-half of the expenditure of 1911-12. This removed for the moment a grievance which had been steadily growing in magnitude since the last revision of the grant ten years before. It is gratifying to note that the Ahmedabad municipality and a few others have utilized a portion of this grant in giving Code pay to their teachers. Where this was not done, and the municipal teachers found themselves at a disadvantage as compared with the Local Board masters, representations and applications came pouring in. It is certainly not to the advantage of a municipality that its experienced trained teachers should be reverted to Local Board service; but if the municipality obdurately refuses to give them the pay to which they are entitled there is no help for it.

46. **Schools in Native States (Boys').**—The number of these increased from 2,464 with 146,498 pupils to 2,497 with 148,862 pupils. Though education has been free in some of the states for several years past, the attendance does not seem to improve. Besides the two aided schools in the Mewasi Estates (West Khándesh) the Chief of Singpur opened a school at his capital which is attended by 61 pupils. The Chief supplies books, slates, etc., and sees that the children are not repeatedly absent without good cause. A report was spread that the object of opening the school was to collect a number of children, and then to transport them to unknown distant places for a nefarious purpose, and the attendance consequently thinned; but the action taken by the Chief mended matters. The teachers in state schools are generally poorly paid, especially when there is no income from fees.

47. **Aided Schools (Boys').**—The number of these increased from 2,035 with 89,422 pupils to 2,120 with 93,197 pupils. Many of them are mission schools doing the thankless and difficult work of educating the children of the depressed classes. Two schools in the Mewasi Estates were awarded grants, the Akalkuwa school meeting in a hut erected at state expense, while the school at Gangthe had an encouraging attendance of 41. For the latter the Chief opened a boarding house and was willing to bear all the expenses, but the parents objected on the ground that they might then lose all parental control; so the matter was compromised, the parents sending in provisions, while the Chief supplies a cook and supervises the morals of the boarders. The Chief has also spent Rs. 1,800 on a building for the school. The teachers are lent by the Department, and no fees are charged in either school. From the Poona district the experiment of aiding small indigenous schools from local funds is reported to have been successful. In Thána district there are 18 schools for Christians with a special curriculum aided as indigenous schools from Provincial funds, and also by the District Local Board, which maintains two more schools of a similar type of its own; all are favourably reported on. In Sind Mr. Hesketh is inclined to think that some of the aided schools are a source of weakness:—

"They cannot be worked at a profit if qualified teachers are employed. The managers are bound to make as much out of fees as they can, thus putting an obstacle in the way of the poorer children; and the existence of these schools tends to make the municipality reluctant to open schools of its own in the same locality. In one case the Karáchi Deputy found that out of the expenditure of about Rs. 120 per mensem on staff the manager paid himself Rs. 50, his father (about 60 years old) Rs. 40, and distributed the balance of Rs. 30 among the other members of the staff, who did almost all the work."

In the year under report 87 new schools were brought upon the aided list, making 2,394 in all: the allotment was Rs. 1,12,200.

48. **Night Schools.**—The number of these increased from 175 to 178; but the number of pupils declined from 4,543 to 4,507. At one of the schools in Bombay arrangements have been made for the instruction of about 150 policemen, who are let off their duty for an hour for this purpose on alternate days. The Deputy remarks that "to see these bearded custodians of our life and property at the age of 40 or 45 leaving aside for a while their police batons for

English books, and studying with the zeal of school boys under the discipline of a spare-sized man, is an unusual sight in a Bombay night school." At Chambáli (Poona) the experiment is being tried of holding the school only on three nights in the week, so as to give the pupils some rest on the other evenings. At Kalwan (Násik) an Urdu night school is attended by revenue and postal peons; a postman of 50 was found to be attending regularly and eager to learn, while the local postmaster, a Bráhman, was also attending for the purpose of learning Urdu. In Káthiáwád only one such school now lingers, and it had only 10 pupils.

49. **Private Schools.**—The number of these declined from 3,032 to 3,020, but the number of pupils increased from 80,568 to 80,858. Of these 3,020 schools, 183 were classed as advanced, 2,390 as elementary, and 447 as not conforming to departmental standards. Of the advanced schools 117 teach Arabic or Persian, 54 Sanskrit, and 12 other Oriental classics. At Sholápur Mr. Brahme discovered a school which is attended by over 300 pupils, and which successfully competes with a well-conducted municipal school in the neighbourhood; he remarks that any attempts at inducing the proprietors of schools of this type to seek recognition meet with little success, as they are afraid of losing private support in case they accept Government aid. At Deoláli the Arya Samaj maintains a "Gurukul" which admits boys of 8 or 9, and keeps them there till they are 25. Caste distinctions are not observed, the pupils must be unmarried, and the Vedas, Sanskrit and Gujaráti are taught. The number of pupils is about 40, of whom only two are Deccanis. In the Ahmedabad and Surat districts careful enquiry has brought to light an increased number of schools teaching Arabic or Persian; these are mosque madressas which are diverting a large number of Mahomedan children from regular schools. In Sind as usual the existence of most of the private schools is reported to be precarious, and the statistics unreliable.

50. **Primary Schools for Girls.**—These increased from 1,154 to 1,199 and the pupils from 84,739 to 90,594. There are also many girls in boys' schools, so that the total number of girls under instruction in primary schools increased from 126,703 to 136,378. In Bombay the Mangrol Jain Sabha school, which was registered for the first time, is attended mostly by married women, some of them very elderly, of the Jain community; it lays special stress on religious and moral education, and at the same time teaches the three R's. One of the aided schools has a cookery class, and another a laundry class. In most of the Sátára Local Board schools the range of instruction does not extend beyond the third standard, as the girls are withdrawn at the marriageable age. The Urdu school at Málegaon (Násik) has an attendance of 172, and is the largest school of its kind in the Central Division. A girl from the C. M. S. school at Násik got a middle school scholarship, perhaps a unique distinction. There seems to be some demand in West Khándesh for a few more girls' schools, and the municipalities think of spending part of their additional grants on staffing their girls' schools with more efficient teachers. In the Northern Division there is a great want of Mahomedan trained mistresses; and Ráo Bahádur Godbole remarks that progress among the Hindus is also retarded as the girls generally leave the school at the age of 11 or so, which is regarded as a marriageable age. This is a matter of Hindu social usage which only the Hindus themselves can change. In Sind the number of Local Board schools for girls increased from 11 to 17, and the number of pupils from 509 to 753. The Inspector is doubtful about the success of some of the new schools, as the qualifications of the mistresses are meagre, and one headmistress has already been found to be barely conversant with the work of the first standard; but he did not wish to appear to be standing in the way of girls' education.

51. On the subject of primary education in Sind I make a few extracts from the report of Miss Brooke, the Inspectress:—

"At the practising school at Hyderabad there has been a marked increase in the number of girls remaining in the school as late as the 5th standard, viz. nine this year as compared with the three which has been the maximum for the past ten years. This is accounted for by the creation of the English class. The work of the practising school is carried out methodically, the children are exceedingly well behaved, most intelligent, and not only cleanly but even very well dressed. . . . . The Local Board School at Gajan Sahil

was visited by me for the first time this year. The staff is composed almost entirely of the headmistress and her relatives, and the headmistress' husband is the headmaster of the boys' school. I visited the school at the special request of the headmistress, as she had complained that the parents objected to the girls being inspected by the Deputy Inspector and his assistants, and that the numbers would increase were such visits discontinued. The girls were fairly instructed in the three R's and in sewing. On another occasion being only a few miles from the village I paid an unexpected visit, riding on camel up to the very door one morning at school time. My dramatic entrance into the courtyard was a great shock to the only member of the family present, for the schoolroom was locked, and neither teachers nor pupils were anywhere to be seen. I found that the headmistress and the whole staff had departed to a village some distance away. The headmaster of the boys' school had accompanied his wife, thoughtfully filling in the attendance registers of pupils and teachers in both schools for some days in advance before leaving. Needless to add that the Deputy has not been asked to discontinue his usual visits, but on the contrary to pay an occasional unexpected visit in addition. . . . The Karáchi municipal schools have improved noticeably during the year under report, since the permanent lady superintendent, Mrs. G. F. Desai, has been in charge. . . . The inadequate accommodation of Mahomedan school No. 1 is notorious and should no longer be tolerated. It may be literally described as poisonous. The teachers complain that in the hot season teachers and children faint from the heat and airlessness of the rooms. It is impossible to be in the school a few minutes without feeling ill effects; it is not only airless, but very unsavoury. The new municipal girls' schools have been designed and built without any reference to the Inspectress; they might have been much better suited in many ways to the needs of teachers and pupils. . . . The Gujarátí and Mahomedan schools are much better taught and disciplined than the Sindhi schools. . . . The municipal school at Tatta is one of the best in the whole of Sind; it is a pleasure to inspect and visit. On my recent visit to Tatta the Collector on my recommendation presented Mr. Udhanmal on his retirement with an Afrinamáh and lungi for his long and approved service in the cause of girls' education. Such a distinction conferred upon a girls' school teacher at a darbar has made a good impression, and I look forward to the near future to see such honours extended to our trained mistresses. . . . At Hyderabad it is noticeable that the Amil children are very unruly, and where teachers are inexperienced or of a class inferior to that of the children, firmness in their management is lacking. Children threaten to leave the schools on the least provocation, and parents foolishly support them instead of the teachers."

52. From Miss Corkery's report on primary schools, of which she visited 84 in the course of the year, I extract the following:—

"It is worthy of note that the Ahmedabad municipality have all their Gujarátí girls' schools entirely staffed by women, and are endeavouring to secure female teachers for the Urdu schools also. This is a decided advance on the state of things that prevailed 10 years ago, when a headmistress would be reduced to tears at the prospect of the male assistant going on leave or being transferred, for she would say, 'Who will do the daftari work?' I think that there are hopeful signs that the trained Indian woman is growing more self-reliant, for in many of the schools I visited the headmistress or a female assistant were able to manage the registers and correspondence. I was also struck with an incident in the Godhra municipal girls' school. Knitting is inserted in the needlework syllabus; although wool was obtainable in the local shops, a sufficient quantity of knitting needles was not forthcoming. The teacher removed the ribs from an old umbrella, had an edge put on by a knife-grinder, and improvised the required number of needles for the whole class. I think I am right in stating that ten years ago the children would have sat unemployed during the knitting hour. I believe the headmistresses of primary schools would do better work if they were relieved of some of the burden of teaching, and had more time for supervision. In many a village school the headmistress has herself to teach the 3rd and 4th standards and keep an eye on the infants, for I am afraid the little ones get very perfunctory attention. Public opinion does not allow of the headmistress keeping a servant; in addition to the cooking and scrubbing there may be two or three little ones to be cared for, and all this leaves the unfortunate woman very little leisure for preparing the subjects she has to teach, if she is obliged to be in school from 11 till 5. . . . In almost all the Bombay municipal schools I visited the height of the scholars had not been considered when providing benches for them. . . . The weakest points noticed were the teaching of arithmetic and object lessons. Actual weighing and measuring is hardly ever undertaken. In one school an old fossil was in charge of the infant class. He was giving a lesson on salt, but proceeded for some minutes without showing the children a sample. On my suggesting that the lesson would prove more interesting if accompanied by simple demonstration, he opened a drawer and produced a packet of salt. Holding a few grains in his hand he asked the class what it was. With one accord they shouted *Sajee*. The teacher replied 'No, it is salt,' and with a disappointed air returned the packet to the drawer, and continued the lesson. . . . The Vanita Vishrams established at Surat and Ahmedabad by philanthropic Hindu ladies are doing excellent work among Hindu girls and women who find the ordinary school hours unsuitable. In the Surat Vishram, in addition to being taught household duties and needlework, the elder girls receive instruction in dyeing. If similar home-classes were established by Hindu agencies in the principal towns I believe they would help to remove much of the ignorance that prevails."

Before leaving the subject of girls' education I may say that Rs. 75,000 were allotted for the elementary education of girls from the Durbar grant; and that about Rs. 16,000 were sanctioned for giving Code pay to trained mistresses.

53. **Examination Results in Primary Schools.**—The total number of primary schools increased from 12,763 with 757,130 pupils to 13,368 with 814,409 pupils. By order of Government standard III was transferred from the Upper to the Lower Primary stage. Hence the number of pupils in the Upper Primary stage decreased from 213,509 (including 18,103 girls) to 138,177 (including 10,529 girls). In the Lower Primary stage the number reading printed books increased from 283,070 (including 43,946 girls) to 403,451 (including 58,562 girls). The number not reading printed books increased from 260,551 (including 64,654 girls) to 272,781 (including 67,287 girls). The number of pupils presented in the higher standards in British districts was as follows:—in standard V, 18,214 of whom 10,478 passed; in standard VI, 9,171 of whom 5,289 passed; and in standard VII, 3,451 of whom 1,943 passed.

54. **General.**—In 1911 in response to a call from the Government of India I framed a rough programme of suggestions for the improvement and extension of education in the next few years. The items which directly related to primary education were the following:—

1. Giving trained teachers their full Code pay.
2. Extra accommodation for existing schools, *i. e.*, new buildings or extra rooms to be added to existing buildings.
3. Extra equipment.
4. Extra assistants for undermanned schools.
5. New schools at the rate of 500 per year.
6. Scholarships in Urdu central schools.
7. Scholarships for boys proceeding from rural to full primary schools.
8. Recouping the minus balances of certain District Local Boards.
9. Grants to certain Boards to balance their receipts and expenditure.

In the last four years nearly 1,900 new schools have been opened at a recurring cost of over 3½ lákhs, and over 5½ lákhs have been distributed amongst the teachers in improved pay; and it is hoped that in two more years face-value and Code pay will be secured to all who are deserving of them. Grants are also being made for extra assistants; and arrangements are being made for promoting the building and extension of schools by means of free grants, *i. e.*, grants of the full value of the building. Items 6 and 7 have not yet been dealt with; but the East Khándesh Board has been given a special grant of Rs. 17,000 to wipe out its deficit, and has been promised an additional recurring grant of Rs. 15,000 towards balancing its educational budget in future. In addition, as already noted, the municipalities have received nearly Rs. 1,30,000 to bring their grants up to one-half of their expenditure. Out of the 11 lákhs' grant of 1911 Rs. 32,000 were given for Local Board, and Rs. 16,000 for Municipal buildings.

55. From the Central Division it has been suggested that the position of untrained teachers needs further consideration. Although the scale of their salaries has recently been raised to Rs. 9, 10 and 11, it remains meagre and unattractive. On the other hand if these rates are improved, the initial rates for trained teachers may have to be raised also; and I am not prepared to recommend this until at least the deficit in the Code pay, still amounting to over three lákhs, has been worked off. Maratha educational conferences were held at Málegaon (Poona) and at Dhulia, and a Mali Shikshana Parishad at Sátára. At the suggestion of Mr. D. S. Garud, Government directed two experiments to be tried in the Dhulia táluka, where from March last the higher classes in small schools meet in the morning only, and the lower ones in the afternoon; and a whole holiday is given on bazaar-days.

56. In the absence of any report from Mr. Lory, I am unable to say anything special about the Southern Division. In the Northern in the last four years the number of new schools opened was 361, of which 330 are supposed to

have taken root; 16 of them were Urdu schools, 32 were for girls, and 8 for the depressed classes. Twenty had to be closed and transferred on account of low attendance and the villagers' apathy. The average attendance during the year varied from 20 in Panch Mahâls to 31 in Surat. From the grant for Code pay 199 teachers received the face value of their certificates, and 501 received one grade of promotion. In spite of all efforts to adjust school hours so as to suit the special needs of each locality, attendance remains unsatisfactory, especially during harvest time. Out of 97,000 pupils in Local Board schools nearly 37,000 paid no fees.

57. From Rájkot the Agency Educational Officer writes:—

"In the infant class in many schools we find children who ought not to have been admitted into the school at all, and who are there simply because the mothers find it convenient to let the teacher look after them during school hours. The total number of the children thus admitted to school too early must be large; and I venture to think that 7 or 8 per cent. should be deducted from the total numbers to get at the numbers of those really under instruction."

58. In Sind the revised curriculum for rural and full primary schools has been drawn up, and is now under the consideration of the Collectors. Text-books on modern lines are much required, especially in arithmetic; in this the examples should be simple and drawn from everyday life, not from "papering walls." Mr. Hesketh remarks that in some ways there is more need of experimenting in vernacular training colleges than in the secondary training college, but that very little is being done, at least in Sind. It is thought that the introduction of Gujaráti standards with Sindhi as a second language into some of the desert schools would do much to encourage education amongst the Tharris. Most of the inspecting officers held conferences of masters during their tours; in the Rátodero táluka of Lárkána monthly meetings of masters were held with some success; and similar meetings have been arranged for the Karáchi municipal masters. At Bakrani (Lárkána) three school boys died suddenly (possibly poisoned by another boy), and the villagers rushed to the conclusion that the school house was haunted. Some months later there were one or two more deaths, which frightened them more than ever. However in June the assistant deputy lived in the house for some days, and on the Viceroy's birthday it was solemnly exorcised by the leading moulvi and bawa; further incantations were to be made after a month, and if nothing untoward occurred then the villagers promised to consider the question of sending their children to school again. In selected schools in most of the districts quinine is administered regularly during the malarial season. Mr. Hesketh believes this experiment capable of extension, and that the provision of quinine in sufficient quantities would not only reduce the amount of malaria among school children, but also convince the people of its efficacy; he suggests that the experiment should be tried in high schools also.

59. As regards the Musulman community and its attitude towards education, Mr. Chatfield, the Collector of Sukkur, writes:—

"My own opinion is that there is not much to choose between the Musulman and Hindu in this respect, both being indifferent to primary education. As schools are generally found in the larger villages the Hindus, being residents, have an advantage over the Musulmans who have generally some distance to cover from their homes. But as soon as the boy is old enough to be of the slightest use in the shop, the bania invariably withdraws him. But the poorer Musulman like the Hindu is eager enough for education if he thinks it will lead him into Government service. Both are forward in clamouring for English schools to be started in their villages. Though the percentage of Musulmans in middle schools is very small, this is due, I think, to the fact that such schools are situated in the big towns, where the population chiefly consists of Hindus. If free boarderships or scholarships are given to Musulmans, any number of them will come forward. There are 300 rejected applications for free boarderships in the Sukkur Madressah boarding house. There is a proposal now to grant a number of scholarships to Musulmans at high schools, and in my opinion there will be a great rush for them."

IV.—EDUCATION OF SPECIAL CLASSES.

60. **Rajkumar College, Rajkot.**—Mr. Mayne going on leave in October 1912, Mr. J. T. Turner acted as Principal. The number of Kumars declined from 42 to 31, of whom three-quarters came from Kathiawad; there was only one entry against 11 withdrawals and one death. The arrangements for teaching science were condemned by the inspecting officers, and are to be improved; in all other respects the year's work was satisfactory.

61. **Girasia and Talukdari Schools.**—Attendance at the Gondal Girasia College fell from 65 to 55; at the Talukdari Girasia School at Wadhwan the number remained 67. The number of children of these classes attending ordinary secondary schools increased from 285 to 323; those attending primary schools increased from 2,441 to 2,470. The Wadhwan school was inspected by Mr. Lory, who reports the discipline to be splendid, and the whole life so ordered that it turns out decent, well behaved, manly young men with fair educational attainments. The Godhra Talukdari school had 22 pupils, and the Scott College at Sadra 32. There are hostels for boys of this class at Dhandhuka and Nadiad; in the Ahmedabad District the number of Girasia and Talukdari pupils increased from 1,160 to 1,178, whilst in Kaira there were 77 Thakurs with 5 minors under instruction. In Sind the Talpur boys attending the Sind Madressah declined from 25 to 20.

62. **Mahomedans.**—The total number of Mahomedan pupils under public instruction increased from 182,472 (including 34,690 girls) to 191,835 (including 37,038 girls). Those in Arts colleges increased from 146 (including one girl) to 148 (including one girl), and those in Professional colleges from 37 to 46. I notice that 66 Mahomedans passed the Matriculation, 37 the Previous, 15 the Intermediate, 10 the B.A., and one the M.A. The number in secondary schools increased from 5,543 (including 51 girls) to 6,027 (including 60 girls). The number in primary schools increased from 132,986 (including 20,959 girls) to 140,801 (including 22,240 girls). The number in special schools increased from 752 to 936, of whom 226 were under training against 180 in the previous year. The number in private institutions increased from 43,008 to 43,877.

63. In the Central Division the total number of Mahomedan pupils increased from 28,668 to 33,867. From the Násik District it is reported that the number of Mahomedans under instruction is larger than that of Brahmins, and that Marathi schools are preferred by many Mahomedan parents to the Urdu schools specially intended for Mahomedans; in fact there does not appear to be much demand there for a purely Urdu course, but rather for a Marathi course with Urdu reading and writing. The only Urdu text-books at present available are more suited to the needs of pupils in the Punjab or other provinces than to this Presidency. A Moslem educational conference was held at Poona in September 1912, and was opened by His Excellency the Governor.

64. Mr. I. I. Pathan, who was appointed Special Mahomedan Deputy for the Southern Division in June 1909, was asked to give a summary of the results of his work in these four years. He reports that during this period the number of Local Board schools and classes for Mahomedans has increased from 100 to 177; the number of municipal schools and classes has increased from 46 to 50; and the number of indigenous schools has increased from 16 to 24. The number of pupils in these schools and classes increased from 7,715 to 13,934; whilst the number of pupils in schools other than Urdu increased from 6,910 to 8,141. In villages where there is no Urdu school Mahomedans are advised to send their children to such school as there is; in villages where there is an Urdu school Mahomedans are clearly given to understand that they are at liberty to patronize either this or the non-Urdu school. Mr. Pathan claims that the percentage of Mahomedan pupils to the total Mahomedan population has risen from 3·3 to 4·8; and their percentage to the Mahomedan population of school-going age from 21·8 to 32·2. During the same period the number of trained masters has increased from 80 to 115; the number of those untrained but qualified from 19 to 44; and the number of those neither trained nor qualified from 170 to 243. Many of those with low qualifications have been persuaded to try to improve their knowledge by reading. The supply of qualified teachers, however, is not

likely to improve until central schools have been established to bring boys on to the Vernacular Final and the training colleges; and proposals for such are under consideration. Still last year 22 candidates for Urdu masterships presented themselves at the training college entrance examination, of whom 14 were admitted. An encouraging sign is the increase in the number of boys studying in the higher standards in the Kanarese districts; those in the 6th standard increased from 54 to 101, and those in the 7th standard from 26 to 69. The number of Mahomedan candidates who passed the Vernacular Final during the four years 1905 to 1908 was only 76; the number who passed in the last four years was 170, of whom 42 joined the training college and 21 have been serving as Urdu teachers. Mr. Pathan is not a young man, but he has been very active, and I think he is to be congratulated on the results of his work; he has also taken a great deal of trouble in framing revised Urdu standards, and in finding out Urdu text-books.

65. In the Northern Division the total number of Mahomedans under public instruction increased from 25,490 to 26,277, and the number of Urdu schools from 113 to 132. The Mahomedan Deputy at Broach writes that the number of pupils would increase greatly but for the moulvis, who for their own private interest preach against secular education, especially for girls, and by opening maktabs to teach the Koran only take away many pupils from flourishing schools. The same officer complains of the mania for opening Urdu schools when the mother tongue of the pupils is Gujarati, and thus inflicting upon the children the burden of learning two languages badly instead of one well. The central school at Tankaria (Broach) was disturbed by a quarrel between the boarders and a Mahomedan boy of the village, which resulted in the boarders running away for a time; but is now working peacefully as usual. Four of its pupils passed the Vernacular Final, and two were admitted to the Training College. In all 146 Mahomedans appeared for the Vernacular Final, of whom 60 passed; but very few are attracted to the Educational Department. In the course of the year it was decided to hold the Vernacular Final in Urdu as an experiment, and also to open an Urdu training class in the college at Ahmedabad; for which purpose a teacher was selected who has now been deputed to Lucknow for a course of training. In Kathiawad the number of Mahomedans under instruction rose from 15,147 to 15,735.

66. In Sind Mr. Hesketh has been studying the 1911 census report, and I give some of his results:—

"The following table gives the number of persons per mille who were literate in 1911.

	Hindus.		Musalmans.	
	Males.	Females.	Males.	Females.
Gujarát	180	18	270	19
Konkan	94	6	174	16
Deccan	79	4	131	8
Karnátak	107	4	93	5
Sind	233	17	24	2

Three facts stand out from this table. (1) The Sind Hindus are the most literate in the Presidency. (2) The Musalmans in the Presidency proper are more literate than the Hindus. (3) The Sind Musalmans are hopelessly backward. The position is even worse if Karáchi City, which is cosmopolitan, be excluded; the figure is then reduced from 24 to 21 males per mille . . . . The following table shows the literacy in English per mille:—

	Hindus.		Musalmans.	
	Males.	Females.	Males.	Females.
Sind	24	0·5	1·4	0·05

For the whole Presidency including Sind the figures show 17 males and 3 females as literate in English . . . . It may be useful to examine the number of pupils attending school with reference to the population. The following table gives the number attending school per mille of the population on 31st March 1913. I have omitted private institutions in which there is practically no education except Koran reading.

	Hindus.		Mahomedans.	
	Boys.	Girls.	Boys.	Girls.
Total number in public institutions ...	80	18	25	2
Number in secondary schools and colleges.	11	0·4	0·9	0
Number in Local Board schools per mille of rural population.	55	2·4	11	0·1

The superiority of the Hindus as regards secondary education is most marked.

Whilst the number of Mahomedan boys attending school is 25 per mille of the male population, only 3 Mahomedans under the age of 15 per mille of the male population are returned as literate; in the case of Hindus, while 80 boys per mille of the male population are attending school, the census figures give 30 boys under 15 as literate. It is obvious that either a different standard of literacy has been taken for Mahomedans, or that their attainments at school are very low. Half of the Musalman pupils attend mulla schools, and I am afraid that the only conclusion to be drawn from the above figures is that the large majority of these do not acquire that proficiency in reading and writing which would entitle them to be called literate. It is probable also that many of the boys in Local Board schools do not remain long enough to enable them to learn to read and write, while they are admittedly very irregular in attendance.

The most striking proof that the Mahomedan community in Sind is beginning to realize the value of education is to be found in the fact that in the first term of 1913, there were 29 Mahomedans in the D. J. Sind College as compared with 8 in the corresponding term of 1903. During the year the rules for the King Edward Memorial Scholarships were published, and the first scholars were elected in January 1913. These scholarships are payable from the interest on a fund amounting to Rs. 75,000 given by H. H. the present Mir of Khairpur; part of the interest is reserved for scholarships in University colleges and technical institutions, and the remainder for scholarships at the Sind Madressah. There are at present four Mahomedans in the Sind College who receive stipends of Rs. 40 p. m. from District Local Boards on condition that they undertake to serve in the Educational Department after taking their degree. There are now three men in the department who have held these scholarships. The Karáchi District Local Board has also awarded two scholarships to Mahomedans, one of which is held by a student of the Poona College of Engineering.

The number of Mahomedan pupils in high schools has increased from 705 to 804. At the Sind Madressah the number of boarders has increased in ten years from 75 to 185, and the number in the matriculation class from 7 to 47. The Naushahro Madressah has been doing very well, and the measures taken in 1911 for re-organizing the school have been amply justified. At the Pithoro Madressah it was necessary to appoint a new headmaster during the year; and it is now agreed that this school will never do any good until it is transferred to Mirpurkhas. A special committee was appointed by the Commissioner in Sind in February to enquire into the condition of the Larkana Madressah and make proposals for improving it; an exhaustive report was submitted. Opinion is divided among educated Mahomedans as to the necessity for and value of Madressahs. The more advanced favour special hostels attached to existing high schools. This policy has been adopted for the time being at Sukkur, where there is now a successful Mahomedan boarding house with nearly 50 boarders, who attend the municipal high school. I think that the less enlightened Zamindars prefer a purely Mahomedan school; on the other hand the difficulty of finding a suitable principal and staff, and the extra cost involved, are strong arguments in favour of the Mahomedan boarding house attached to an ordinary school . . . .

In primary schools there has been no marked increase in the number of Mahomedan pupils; the number of girls in Local Board schools, however, has increased from 85 to 127. The Vernacular Final was passed by 271 Mahomedans. A good deal is heard about the lack of Mahomedan teachers in the Educational Department, and more especially in the training college. The fact is that qualified Mahomedans will not join the department so long as the dearth of them in Sind results in rapid promotion in other departments. There are only four Mahomedans in the department; of these three are graduates who received Local Board stipends to enable them to complete their University course. In this department perhaps more than any other it is essential that masters and inspecting officers should be reasonably well qualified, and I doubt whether we are justified in giving Mahomedan

matriculates appointments to which Hindu graduates only attain after several years' service. I believe that younger men among the Mahomedans realize that in the long run such appointments will do more harm than good. As regards Local Board service it has been the rule for some time that half the stipends at the training college should be awarded to Mahomedans. The following shows the distribution of Local Board and municipal masters by caste:—

	Government and Local Board Schools.		Municipal Schools.		Total.
	Trained.	Untrained.	Trained.	Untrained.	
Mahomedans	223	409	68	59	759
Hindus	344	516	142	81	1,083

It will be seen that Mahomedan masters in Local Board schools comprise over 42 per cent. of the total. The percentage of Mahomedan pupils in Local Board schools curiously enough is exactly the same.

During the year the experiment was initiated of appointing mullas on Rs. 4 p. m. to selected schools for the purpose of teaching the Koran before or after school hours. The net increase of Mahomedans in the schools selected for the experiment was practically *Nil*. It is quite likely that the allowance is not sufficient to induce a mulla to give up his own private school.

As to the mulla schools themselves the first point that has been brought out is that the mulla himself is not sufficiently well educated to teach anything but Arabic Sindhi of the simplest type. The second point is that there is very little regular and systematic work in many of these schools. That the mulla himself sometimes realizes the deficiencies of his own school is illustrated by the fact that one of them sends his own sons to the neighbouring Local Board school . . . . On the whole I think that a certain number of boys do acquire a rudimentary knowledge of the three R's in these schools who would otherwise be left in ignorance. What is more important is that a fair number of girls get some notion of reading, writing and counting. The award of grants to mullas for sending boys to Local Board schools has done a considerable amount of good; but the number sent annually, about 500, is small in comparison with the total number of boys on the rolls . . . . After further consideration of the problem of mulla schools I have come to the conclusion that a separate organisation is necessary for the inspection and control of these schools. The existing inspecting staff cannot afford the time to deal properly with them. I therefore propose the appointment of a special Mahomedan Deputy for mulla schools; on that a Mahomedan be placed on special duty for two years with the status and pay of a Deputy. At first I would give him one or two Mahomedan Local Board masters as assistants, and I would limit his operations to one district. His duties would consist in devising and carrying out schemes for increasing the efficiency of the mullas in addition to the ordinary inspections for assessing grants. Above all he must be a missionary of education among the zamindars and cultivators. Ultimately, if the scheme proved successful, one or two Mahomedan assistant deputies would have to be appointed to each district to carry on the work under the orders of the special Mahomedan Deputy."

In the course of 1912 a bill was introduced into the Bombay Legislative Council by the Honourable Mr. Bhurgri to provide for the levy of a cess from the Mahomedan landholders in Sind for the promotion of education among the Musalman community.

67. **Aboriginal and Hill Tribes.**—The total number of pupils increased from 20,954 to 23,309. In the Central Division the number of boys increased from 3,388 to 4,006, and the number of girls from 90 to 94. Of these 4,082, including all the girls, are in primary schools, 4 are attending secondary schools, and 2 are receiving University education; 4 are in training schools, 4 are in the Reformatory, and 4 are in other special schools. There are 20 boarders of these classes at Ghoda (Poona), who are fed, clothed, and educated at the expense of the District Local Board. Since this boarding house was started in 1907 thirty-five Koli boys have availed themselves of it; two of these gained the second year's certificate of the Poona training college, and are serving as teachers; five more passed the Vernacular Final, and are also employed as teachers; twenty are in the hostel still; and eight left without completing their education, or giving any return for the generous help received from the Board. In the Poona District there are 28 special schools for Kolis, of which 15 are under masters of their

own caste. The attendance in the Dang schools in Akola táluka (Ahmednagar) declined owing to the scarcity prevailing in those parts. The hostel for Kolis and Konkani Kunbis at Peint (Násik) is doing moderately well, and had 10 boarders against 4 in the previous year. In the Dhadgaon school on the Satpuras attendance increased from 32 to 62. The school draws its pupils from 12 neighbouring villages, and a servant has been engaged to bring the boys in; when this man neglected his duties the headmaster (who has already learnt the language of the aborigines) himself went round to collect the boys. The Nandurbar Bhil boarding house had 22 inmates. Two Bhils are under training at Dhulia. Five appeared for the Vernacular Final, of whom four passed; one of these is being trained, two are working as teachers, and one is learning English.

68. From the Southern Division no report has been received. In the Northern there are four special schools with hostels attached, *viz.*, the Bhil central school at Dohad which has been given a special grant of Rs. 5,000; the Diwa school in Broach; the Godsamba school in Surat, which continues to be very successful; and a training school at Mokhada in Thána which requires improvement. In Kathiawad the number of pupils rose from 30 to 134; in Sind it fell from 5 to 0.

69. **Depressed Classes.**—The total number of pupils increased from 26,606 to 29,890. In the Central Division the number of boys increased from 12,576 to 14,742, and the number of girls from 1,286 to 1,343. Of the total number 15,594 (including 1,334 girls) are in primary schools; 155 (including 4 girls) are in secondary schools; 11 are in training schools, 169 in industrial schools, 31 in the Reformatory, 120 in other special schools, 4 are receiving agricultural, and 1 commercial, instruction. A Depressed Classes Mission Maharashtra conference was held in Poona in October 1912 under the presidency of Dr. Sir R. G. Bhandarkar. At the Vernacular Final 14 low-caste candidates passed, three of whom are now under training; one Mahar who passed and was a Local Board scholar broke faith with this department and was unfortunately taken up by the Revenue department in Sholapur. In many cases it is found that the classes that aspire to rise to the position of advanced castes are not liberal enough to concede such privileges to castes that they themselves consider to be inferior. For instance at Dehu the Mahars who have supplied the school house refuse to allow Mangs to sit in it along with their own children; at Vadhe the Chambhars object to Mahars attending the low-caste school for fear of pollution.

70. There is no report from the Southern Division. In the Northern the total number of pupils declined from 6,104 to 6,036; the decrease was particularly noted in Kaira, where 11 unaided mission schools were closed. In all there are 74 schools for children of these classes, of which 22 are Local Board, 20 municipal, and 28 aided. In Broach three Dheds and one Bhangi appeared for the Vernacular Final, and two of the Dheds passed. A Mahar passed the third year examination of the Poona training college, and is employed in Thána. The number attending secondary schools fell from 15 to 12. In Kathiawad the number under instruction rose from 42 to 55. In Sind the number has fallen from 292 to 225, in addition to whom there were 31 Hurs (a criminal class).

71. In July 1912 Government directed one middle school scholarship of Rs. 5 from Provincial revenues to be reserved in each district for depressed classes. I have already mentioned that the scholar in the Sátára high school is irregular in attendance and shows no progress at all. Mr. Wren mentions that no candidate presented himself in Poona, but does not refer to any other district. Scholarships were awarded at Ahmedabad, Broach, and Thána (where there were actually two candidates); the first boy has joined the Elphinstone middle school, the second has joined the aided Anglo-Vernacular school at Amod. The Thána boy did not join any school at first on account of his mother being ill, but has now been permitted to join the high school at Thána. A candidate at Surat was not found sufficiently deserving. It is not known what happened in the Southern Division.

V.—SPECIAL INSTRUCTION.

72. The number of institutions for special instruction increased from 91 to 129, and the attendance from 5,620 to 7,055.

73. **Secondary Training College.**—This continued to be in charge of Mr. Fraser, from whose report I extract the following :—

"An attempt was made to give the teachers under training more supervised work by placing them in divisions under Messrs. Asklesaria and Adilshah in the middle school for practice in English. It is on these lines that the institution may eventually be developed. The course of lectures at Parel was repeated in 1913. The students were required to write out full notes of the lectures, which was done to the satisfaction of Major Liston. During the vacation they were encouraged to write vernacular accounts of the lectures for the vernacular press; about six did so. Twenty-three of our students have again joined the St. John's Ambulance class. All students are regularly drilled every day, and taught to take drill with younger boys. There has been a hockey game once a week. A number of excursions were made, the expense of which falls entirely on the students; if a small grant could be made for the purpose more might be done. In 1912 there was an attendance of two outsiders at the Principal's open lectures on education, and of none at the Vice-Principal's lectures on school hygiene. In 1913 the average attendance so far has been about ten at the Principal's lectures on method. As announced after Mr. Gould's lectures, there has been a monthly discussion on a moral topic; attendance 17, of whom 10 are ladies from one school. . . . There were six applications for the five places for aided schools. On two or three occasions during the year teachers from Anglo-Vernacular schools, some as far distant as Khándesh, asked for permission to attend a few of the lessons, and this was accorded."

Experience has shown that the college was planned on too modest a scale. A large number of probationary teachers in the high schools are waiting to proceed to it; and trained teachers are not required for these institutions alone, but also for the training colleges for primary teachers, and for the posts of assistant deputy inspectors, the number of which has been largely increased and may be expected to increase still further. As for the aided schools, if the supply of trained teachers is to be enforced seriously, the provision of five places only for them each year is quite inadequate.

74. **Normal Schools.**—The Poona Training College for Men was in charge of Mr. S. S. Nadkarni, who retired from service at the end of the year and was succeeded by Mr. G. N. Khare; Mr. Nadkarni was a loyal and hard-working servant, who had rendered invaluable service to a succession of Directors as their head assistant. At the certificate examination in October 1912 third year certificates were gained by 61, second year certificates by 79, and 145 passed in the first year; in all 285 passed out of 421 examined. At the entrance examination in December 357 appeared and 117 were admitted, of whom 45 were non-Brahmins. Of Mahomedans 18 appeared and 11 were admitted, the rest being found too weak to profit by the course. Of the depressed classes three appeared and a Mahar and a Chambhar were admitted. Of Indian Christians six appeared and four were admitted. In March there were 117 in the first year, 94 in the second, and 48 in the third, making 259 in all, against 222 of last year. A playing field for the students is urgently wanted; at present they have absolutely nothing of the kind. In the practising school attendance rose from 92 to 175, and 16 out of 18 passed the Vernacular Final.

75. At Dhulia Mr. Dange continued to be in charge of the Training School. At the certificate examination 53 passed in the second year and 53 in the first, making 106 in all out of 118 examined. At the entrance examination 216 appeared and 83 were admitted; 18 out of 24 Mahomedans were admitted (four as special cases), 2 out of 5 Mahars, 1 Bhil, and 1 Dhobi. The construction of four additional class-rooms was completed during the year. The practising school had 197 pupils; three boys were sent up for the Vernacular Final, and all passed.

76. At the Poona Training College for Women the Lady Superintendent, Miss Bhor, went to England on leave and eventually died there. I am afraid that there is no doubt that the strain of running this triple institution had told

seriously upon her health. At the certificate examination 106 passed (in five classes) out of 116. There were 107 on the roll, of whom 4 were Mahomedans. One Mahomedan passed the final examination and is serving in a school in the Belgaum district; while another who was not fit to complete the course was given a third year certificate.

77. Normal examinations for both male and female teachers in aided Marathi schools were held: of the men 10 passed out of 17, and of the women 32 out of 49.

78. No report has been received from the Southern Division. In the P. R. Training College for Men, Ahmedabad, there were 258 students against 218 last year. Twenty additional stipends of Rs. 7 were sanctioned out of the Durbar grant; but the Principal complains that the present rates of stipends are inadequate on account of the general rise in prices. For the entrance examination 23 Mahomedans appeared, of whom only two passed; nevertheless 13 were admitted, and 6 who had failed in the annual examination were retained in the first year's class. The total number of Mahomedans increased from 26 to 31; and there were 6 students of aboriginal or hill tribes against 3 in the preceding year. Proposals (amounting to Rs. 86,850) for extending the college and hostel have been sanctioned.

79. Additional stipends have also been sanctioned at the Mahalaxmi Training College for Women, where there were 140 on the roll against 138 last year. There were two Mahomedan stipendiary students in the second year, one in the first year, and three in the preparatory class; these students learn Urdu and have opportunities of teaching it in the practising school.

80. There are two aided normal classes for girls in this division conducted by missions, one at Ahmedabad, and the other at Godhra. In Káthiáwád the Male Training College had 61 students against 65 last year and 69 the year before; it turned out about 25 trained teachers for 44 vacancies. At the Barton Female Training College the year closed with 33 on the roll, of whom 12 were non-stipendiary; 10 teachers were sent out against 24 vacancies.

81. At Hyderabad the class for the further training of trained teachers chiefly in kindergarten and object lessons was abolished from January 1913. Additional stipends were created, and the number of students increased from 136 to 159, of whom 71 were Mahomedans; there were 73 in the first year, 56 in the second, and 30 in the third. At the annual examination in December 141 passed out of 159. A good many of the text-books used in the college, and some of those in the schools, are reported to be obsolete and educationally unsound. At the College for Women the number increased from 14 to 17, of whom 10 were in the first year, 4 in the second, and 3 in the third. At the annual examination 7 passed out of 10. Mrs. Miles complains of the poor quality of some of the recruits, admitted owing to the difficulty of getting any women at all.

82. On the subject of the men recruited Mr. Hesketh writes:—

"At present the majority of the men to whom stipends are given have served for several years as masters in Local Board schools. I was informed that the men recruited in this manner were intellectually inferior to those who entered by competitive examination in former days. There is possibly something in this complaint. At present a clever boy passes the Vernacular Final at 15, and then serves for three or four years as a master. During this period he loses the habit of studying, and when he joins the Training College he has forgotten much of what he learnt at school, and finds it difficult at first to apply his mind to books. . . . What is wanted is something in the nature of a pupil-teachers' centre, or some arrangement by which the headmaster is bound to give a certain number of hours' instruction a week to his untrained assistants."

83. With the help of special grants a number of educative excursions were made by various institutions. The Poona Training College sent a batch of 42 men from the third year class in charge of two teachers to the Kárla caves and to Bombay, where, amongst other things, the causation of malaria and the preparation of plague serum were explained to them at the Parel Laboratory. From the second year class two batches of 36 men each were sent to the Kárla caves and the Talegaon glass-works. The Dhulia Training School sent out 53

students and 8 others to Aurangabad, Daulatabad, Roza, and the Ellora caves. From Ahmedabad a party of 22 students, 2 teachers, and 4 servants went on a fortnight's tour to Abu, Ajmer, Jaipur, Bharatpur, Muttra, Brindavan, Gokul, Agra, Siddhpur, and Patan; the expense amounted to about Rs. 450, of which the travellers had to find some 250 out of their own pockets. Some of the girls from the Poona College for Women were taken to Sinhgad.

84. The total number of primary teachers has increased from 23,579 to 24,650; that of men from 22,237 to 23,245 and that of women from 1,342 to 1,405. Women are therefore 5·6 per cent. of the whole. Among the men trained headmasters have increased from 4,424 to 4,579, and untrained from 5,244 to 5,525; trained assistants from 2,727 to 2,975, untrained assistants who have passed a qualifying examination from 6,451 to 6,345, and assistants who are neither trained nor qualified from 3,691 to 3,821. It is unfortunate that the last class should show an increase, but there are many critics of the department who would be content to see even more of them recruited, regardless of the fact that an inefficient school is a bad advertisement among a population still requiring to be convinced of the advantages of education. The percentage of trained men has increased from 32·1 to 32·4. Among the women trained headmistresses have increased from 429 to 448 and untrained from 99 to 114. The number of trained assistants remains 166. The number of untrained but qualified assistants decreased from 33 to 25, while that of unqualified assistants increased from 615 to 652; but as women are not required to pass the Vernacular Final this last statement is rather misleading, and it would seem as though all who have completed the 5th standard should be regarded as qualified. The percentage of trained women declined from 44·3 to 43·7.

85. The average pay of a trained headmaster in a primary school under a Local Board has risen from Rs. 22-13-11 to 23-10-9; under a Municipal Board from Rs. 30-10-10 to 30-10-4. In Native States it has declined from Rs. 19-4-4 to 19-4-3. The average pay of a trained headmistress rose from Rs. 21-9-5 to 22-15-6 under Local Boards, and from Rs. 27-7-7 to 27-9-2 under municipalities; in Native States it declined from Rs. 20-11-1 to 19-9-9. For the untrained in Local Board service the average pay of a headmaster was Rs. 11-5-4; of a headmistress 11-11-4; of an untrained but qualified assistant 9-7-3; and of untrained unqualified assistants Rs. 9-0-8 (men) and 9-6-1 (women).

86. For the purpose of increasing the output of trained teachers the sum of Rs. 1,50,000 was reserved from the recurring Durbar grant of Rs. 6,70,000. Of this Rs. 30,000 were assigned to the Poona College for Men to increase the output of second year men by 40; Rs. 11,250 were assigned to the Dhulia School to increase the yearly output by 24; Rs. 11,250 were assigned to the Ahmedabad College for Men to increase the output by 29; Rs. 11,250 were assigned to Dharwar College for Men to increase the output by 37; and Rs. 56,250 to the Hyderabad College for Men to increase the output by 25. The total output of trained men is therefore to be increased by 146 yearly. In addition the sum of Rs. 75,000 was reserved from the same grant for the education of girls, and equally divided among the four divisions; part of it will be utilized in increasing the output of trained mistresses by 12 at Poona, 6 at Ahmedabad, 10 at Dharwar, and 10 at Hyderabad, or 38 in all.

87. Another device, for slightly improving the quality of teaching without incurring the heavy liability for the future pay of fully trained teachers, was the opening of local normal classes. This was done from the allotment of Rs. 30,000 introduced by the Finance Committee into the budget of 1910-11. In the Central Division five, and in the Northern six, central classes were opened and attached to good Local Board schools, in which batches of untrained masters were given a little training in the theory and practice of education for six months at a time; in the Southern Division new men who had passed the Vernacular Final were taken up and given a little training in the same way before being employed as assistants. On the whole the experiment was reported to be a success; and though in the absence of orders the classes were discontinued at the end of the year, orders have since been issued that the experiment should be continued for a further period of four years. In Sind untrained men were brought

up to a central class at the Hyderabad Training College; as a room had to be built for this the class was late in getting to work, and it was reported to be unpopular, but as there had scarcely been time to judge of the results it was ordered to be continued for another year.

88. In reporting on this class Mr. Hesketh remarked that if one man is regularly trained annually, and given pay according to the code with regular promotion, the total cost for increased pay (over the pay of untrained masters) during 10 years would be Rs. 1,833, rising to Rs. 10,667 for 20 years, and Rs. 33,167 for 30 years. But this is only for first year men, and the increase in the case of second year men would be much greater. As shown above we are increasing the output of second year men by 146 annually. We are therefore in reality incurring a very considerable liability for the future; and it would be far from prudent to multiply training schools in response to the parrot cry of those who have very little conception of what is really involved in a great increase in the output of trained teachers.

89. With reference to Sind Mr. Hesketh writes:—

"I have recently made an enquiry into the distribution of trained masters in Local Board schools in different districts, their pay and length of service. My object was to obtain some idea of the ultimate responsibility of the Boards in the matter of code pay, but the simple statistics are of some interest.

Certificate	Masters.	Average service.	Average pay.
3rd year ...	390	9·9	34·4
2nd year ,,	68	10·0	25·3
1st year ...	101	7·7	17·8

The two striking features of this table are the marked preponderance of third year men, and the comparatively short average length of service. There is no doubt that a third year man is very much superior to a second year man, but three second-year men can be turned out at the same cost as two third-year men; and what is far more important, the total pay of a third-year man in 33 years, the ordinary length of service, is almost double that of a first-year man and 1¼ times that of a second-year man. I therefore propose for a year or two to limit the number of third-year men to 15 or 20 annually, and to increase the number of second-year men."

90. **Sir J. J. School of Art, Bombay.**—The number of students increased from 357 to 366, of whom 237 were Hindus, 73 Parsis, and 14 Mahomedans. An excursion was made to Ahmedabad, where a number of very creditable drawings, plans, and elevations of temples and mosques were made by the students, including for the first time some ladies. A start was made with a School gymkhana; cricket and hockey clubs were formed, and, thanks to the generosity of various gentlemen, two tennis and two badminton courts have come into existence. The work done in all sections of the School has shown advance, and a most beneficial influence has been exercised by the practising class for the teaching staff held on Saturdays. In the first grade examination 44 passed out of 69; in the second grade 41 out of 45; and in the third grade 22 out of 28. For the Drawing Teacher's Certificate 13 passed out of 21; and in the draughtsman classes 62 out of 116. The Reay Art Workshops were attended by 176 against 171 last year, the average daily attendance being 113. Most of the work done has been educational, but a few commissions were undertaken, including the construction of two models of the proposed gateway to be erected on the Apollo Bunder. It is reported that the Workshops require strengthening in the matter of *design*, which can only be done by having a trained designer on the staff, not so much as an instructor, but as a working member in whose studio the best of the students would spend the last part of their course. The Pottery department had five students; a number of analyses were made and samples tested, and the new biscuit oven was taken into use, but the fritt kiln was found to crack and so was demolished, a new one being built out of the old material by the Pottery staff.

91. **Drawing Classes.**—The number of these decreased from 205 to 195; but the pupils in them increased from 37,659 to 39,027. The examination in the three grades was held as usual at various centres. In the first grade the number of candidates declined from 6,276 to 4,701, while that of passes increased from 2,179 to 3,608, the percentage rising from 34·8 to 76·7. In the second grade the candidates increased from 2,073 to 2,506, and the passes from 652 to 1,170, the percentage rising from 31·4 to 46·7. In the third grade the candidates decreased from 1,117 to 871, and the passes from 895 to 783, but the percentage rose from 80·1 to 89·8. It will be noticed that the total number of candidates declined by about 1,400, and not much light is thrown upon the cause of this phenomenon by the Principal's remark that it may be partly due to the lack of regular inspection of the drawing classes, which has resulted in the teachers becoming stereotyped in their methods, and partly to the study of drawing stopping short at the third grade.

92. **Industrial and Technical Schools.**—In the Central Division these increased from 25 to 27, and the pupils from 1,886 to 2,188. In the Northern there were 6 schools in British districts, with an attendance of 451 pupils, and one in a Native State. In Sind there continued to be 5 schools, but the attendance increased from 287 to 351.

93. Professor N. B. Macmillan has submitted a useful and comprehensive report on the work of these schools during the year, from which I make the following extracts :—

"*Dhulia, Technical School.*—It is stated that the final estimate of the new buildings will probably amount to one lakh, and the cost of equipment will come to Rs. 21,000; total Rs. 1,21,000, or 41,000 in excess of the estimate approved of by me. I have already recorded my opinion that a technical school such as would meet the needs of Dhulia should not cost more than Rs. 80,000 altogether, and I still hold to this opinion.

Ahmedabad, R. C. Technical Institute.—The object for which this school was established is, I am afraid, already being lost sight of. It was intended for the purpose of training textile mechanics. It now seems that higher branches of engineering are being aimed at. If a boy wishes to study these, he should be advised to proceed to the V. J. Technical Institute or the College of Engineering.

Pandharpur, Robertson School of Industry.—Three years ago I gave my approval to an experimental scheme for providing manual training instruction to the classes of the V. J. High school. According to Mr. Bharucha's report the scheme is now in working order, but I cannot report whether successfully or not; a surprise inspection would be necessary before I could do so. Having understood from Mr. Bharucha that the school committee were proposing to make some extensions to the school, I wrote for particulars. I sent back a revised list of equipment, remarking that from some of the items on the list I should suppose that they regarded the institution less as a place for imparting industrial instruction than as a municipal workshop. This tendency is very strong in the case of municipal technical schools, and its existence forms one of the reasons why I have so strongly recommended the appointment of a full-time officer to investigate closely the industrial and educational needs of each particular locality.

Sholápur, American Mission Industrial School.—In February I commented adversely on the state of the school as regards the teaching of carpentry and drawing. The school is not properly equipped for teaching these subjects, and this fact has been pointed out three years in succession.

Sátára, School of Industry.—The report records a distinct improvement in the teaching and work of this school; the superintendent has at last realized the faults complained of, and is making efforts to amend them.

Poona, V. J. Technical Institute.—The condition of this school has been reported on adversely during the past four years; and I advised the withdrawal of the annual grant until the municipality awaken to a sense of their responsibility. The grant has been with drawn accordingly.

Belgaum, Sardars' High school.—The manual training classes attached to this school are very well conducted by Mr. Bendigeri.

Ahmednagar, Sir D. M. Petit School of Industrial Arts.—More attention should be paid to the teaching of drawing. If the experimental work on looms is now at an end, a few boys should be selected annually for a course in the workshop.

Ahmednagar, S. P. G. Mission School.—The school is doing good work with the simple equipment at its command. It would be a great mistake to introduce woodwork machinery; the school will serve a useful object by training artisans after the country manner. It

appears that most of the boys sleep and dine in the workshop; a dormitory and dining-room should be provided.

Nadiad, American Mission Industrial School.—There has been a long interval between the departure of the last, and the arrival of the present, Superintendent, during which time the teaching work and organisation of the school have suffered much.

Surat, Parekh Technical School.—There is the usual good report on this school.

Borsad, I. P. Mission Industrial School.—This is doing good work.

Bombay, David Sassoon Reformatory.—The usual good report.

Bombay, Petit Parsi Orphanage.—This school continues to do excellent work. The sloyd system of manual training is working smoothly, and in a year or two will, I hope, show results in increased mental activity and practicalness of the boys.

Ratnagiri, School of Industry.—Continues to do excellent work but the old lathes should be replaced by new ones.

In conclusion I should like to remark that the system of manual training which is in vogue in industrial schools is not equally suitable for primary and secondary schools. Though giving fairly satisfactory results in connection with high schools and training colleges, where the average age and physical fitness of the boys are high, it will not be found practicable for boys in elementary schools or standards, as it is perhaps too difficult and strenuous a method for training hand and eye. I would therefore advise the introduction of an adaptation of the sloyd system for all schools other than industrial schools. This system while involving little physical exertion, yet affords comparatively great means for mental training, and for inculcating habits of accuracy and neatness. The following is an outline of the syllabus adopted in the Petit Parsi Orphanage, Bombay.

Standard.	*Subjects.*
Vernacular I, II ...	... Clay-modelling and drawing.
" " III ...	... Sloyd paperwork and drawing.
Anglo-Vernacular I, II ...	... Sloyd woodwork and drawing.
" III, IV ...	... Elementary joinery.

On passing the 4th standard boys (age about 16) are selected for the industrial department, the remainder continuing their literary studies in higher standards. Those who take up carpentry are made to perform the usual "exercises" calculated to teach a knowledge of carpenters' tools, and accuracy in their use. As soon as a boy has shown proficiency in the use of his tools, he is put on to making useful articles of furniture, three such being completed by each boy in each year of his three years' course. The designs are usually copied from catalogues of high-class furniture makers, the boy having first to make a drawing, putting in his own dimensions with the help of the teacher.

The system of teaching carpentry by means of "exercises" is often decried by those who do not know much about the subject. It is not the exercises that are at fault, but the teachers who make these exercises an end, and not a means, namely to learn habits of accuracy, and to gain practical knowledge of tools and their uses. When a certain degree of proficiency in the use of tools has been attained, the exercises should be discarded and actual useful work engaged in."

With respect to textile schools Mr. W. T. Pomfret reports that fair progress has been made in several during the last twelve months.

"The majority of the teachers do not understand the theory and practice of the modern methods of weaving. It would be much better if all the applications for such posts were sent to the Inspector, and a selection made by him. One great disadvantage to the development of this particular work is the want of a common curriculum for the schools. The teacher of any class could supplement the course of work by introducing any other relative work which is of importance to the district. Greater progress would be made if there was a keener competition amongst the teachers and boys of the different schools. This may be created by starting a competition for the best collection of cloths and practical results attained in the schools during a given period of time. On leaving the schools the boys have a great difficulty in finding work, as in many districts there is not one handloom weaving factory, and the boys cannot start working on their own behalf owing to their low financial ability. If the Government could provide the most promising boys with a loom and yarn, it would certainly be of great help to the work. The yarn could be prepared in the local school. The money advanced by Government could be paid back by instalments."

Since the close of the year Government have approved of entirely new arrangements for the control of technical education, including the creation of a new Committee of Direction, which will employ wholetime inspectors of its own.

94. **Victoria Jubilee Technical Institute, Bombay.**—The attendance at this institution declined from 356 to 319, of whom 209 were Hindus, 53 Parsis, and 19 Mahomedans. At the entrance examination in January 105 candidates presented themselves, of whom 83 were admitted; 61 of these elected the mechanical or electrical engineering course, 20 the textile course, and 2 the chemistry course. In passing candidates for admission greater attention is now paid to physical fitness. The average age of the students was 18·1. They come from all parts of the country, Mysore and Madras being well represented, while there is a considerable increase in the number coming from the Punjab and Sind. The imperial grant of Rs. 50,000 permitted of a considerable increase in the plant and development of the various sections; and the equipment now compares very favourably with that of many of the institutes in England. The handloom weaving section completed its first year's work in January. The students are selected by the various municipalities and Collectors, and receive a scholarship of ten or twelve rupees each, plus ten rupees from Government. It is too early to say what the result of opening this section will be, but if the proper sort of men are forthcoming it must ultimately exercise a considerable influence for good on the handloom weaving industry of the Presidency. In the new arrangements alluded to at the end of the last paragraph it is hoped to develop the Institute into a central technological institute for the Presidency.

95. **Reformatory Schools.**—At the David Sassoon Institution the year opened with 216 boys, and closed with 241, of whom 114 were Mahomedans and 106 Hindus; 11 boys escaped during the year, of whom 6 were recaptured together with one of the runaways of the previous year. Seven died. Of the 231 boys discharged in the last four years 141 are known to be engaged in honest occupations, and only 5 have been reconvicted. The new premises are kept scrupulously clean, and the spacious compound affords ample space for recreation; but the sanitary arrangements are said to offer room for severe criticism.

96. At Yeravda the year 1912 opened with 178 boys and closed with 164, there having been a temporary want of accommodation owing to the substitution of dormitories for some of the old cells; Hindus numbered 88 against 33 Mahomedans. Eight boys escaped, of whom four were recaptured along with one previous runaway. Three died. Out of 35 admitted during the year 30 were illiterate. Of the 116 boys discharged in the last three years 79 are known to be engaged in honest occupations, and only two have been reconvicted. The new buildings are nearing completion.

97. **Commercial Education.**—In the Central Division 32 more schools were recognized during the year, bringing the total number up to 35; the number of pupils consequently increased from 242 to 908. In the Northern there are 7 recognized commercial schools or classes. In Sind 3 were recognized, but one soon ceased to exist, and the other two have been amalgamated since the year ended. The number of pupils was 125. Just after the close of the year the sanction of the Secretary of State to the creation of a Government College of Commerce in Bombay was received. The usual London Chamber of Commerce examinations were held in April and May 1912, but the results were not known till October, having been despatched by cargo-boat, instead of by the regular mailsteamer. The number of entries for the Senior certificate decreased from 591 to 576, of whom 181 passed; the number of entries for the Junior certificate increased from 155 to 172, of whom 28 passed. In previous years the dictation of short-hand passages was always a sore point with candidates, who complained that an untrained reader did not maintain uniform speed in reading them out; hence a professional man from the B. J. College of Commerce was engaged to read the passages this time. Karáchi this year became a sub-centre, and contributed 27 candidates. As numerous commercial classes have been springing up, about the management of some of which there have been complaints, it has been notified that only recognized schools and classes will be permitted to send up candidates in future for these examinations.

98. **Schools for Defectives.**—In the Central Division the number of these fell from six to five owing to the closing of the Zenana Mission Blind

school at Poona; the attendance was 139 (including 28 girls) against 142 (including 33 girls) in the preceding year. In the Northern the I. P. Mission Blind school at Prántij (Ahmedabad) was closed for want of attendance. The school for deafmutes at Ahmedabad had 20 boys and 6 girls against 18 boys and 5 girls last year; it was awarded a grant of Rs. 503.

99. **Other Special Schools.**—There are 3 pathshalas with 243 pupils learning Sanskrit in the British districts of the Northern Division, two of which are aided. In Native States there are 4 similar schools. These were formerly classed as primary, but as they give special instruction without reference to the primary course they have now been placed under "special" schools.

VI.—ADMINISTRATION AND MISCELLANEOUS.

100. **Administration.**—I was absent on furlough for nine months of the year under report, my place being taken by Mr. R. D. Prior, for whom Ráo Bahádur R. P. Godbole acted as Educational Inspector, Central Division. In this division Mr. S. R. Vanavale, the Deputy in East Khándesh, was transferred to Bombay in April 1912, being succeeded by Mr. K. G. Joshi; from March 1913 Mr. Vanavale went on long leave preparatory to retirement, and Mr. K. A. Bala was appointed to act for him in Bombay. At the close of the year Mr. G. N. Khare, the Poona Deputy, succeeded to the Principalship of the Poona Training College for Men. Three posts of Assistant Deputy were added. In the Southern Division Mr. R. B. Karandikar, the Educational Inspector, retired and was succeeded by Mr. F. B. P. Lory from Ahmedabad. Mr. Karandikar's long and meritorious service in this department was recognized by the award of the Imperial Service Order. Mr. A. R. Jalihal, the Bijápur Deputy, retired and was succeeded by Mr. R. S. Kulkarni; Mr. H. S. Sukhtankar, the Kolába Deputy, died and was succeeded by Mr. N. V. Gokhale. In the Northern Division Mr. Lory was succeeded by Ráo Bahádur R. P. Godbole in January 1913; eight posts of Assistant Deputy were added. In Káthiáwád Mr. D. V. Vyas retired at the end of the year from the post of Agency Educational Officer, which he had held for over 12 years, and was succeeded by Mr. B. K. Thakore. In Sind Mr. F. W. Marrs acted as Educational Inspector until Mr. Hesketh's return from leave in November 1912; a considerable number of changes took place at the beginning of the official year owing to the retirement of Ráo Bahádur Tarachand and Mr. Sobhraj. Mr. Marrs, on relief by Mr. Hesketh, took up the work of the Inspector of European Schools in place of Mr. O. H. T. Dudley, who had proceeded on leave; the Inspector was formally relieved of his duties in connection with the European schools in the Central Provinces in March 1913.

101. At the end of the year Mr. R. D. Prior proceeded on leave preparatory to retirement, and the following extracts from his survey of the changes witnessed by him during his official connection with this Presidency may perhaps be of interest:—

"I joined the Poona high school as headmaster in December 1889, and stayed there three years. I was then transferred to the Elphinstone high school, Bombay, at which I remained four years. I was fortunate in having as my higher assistants men of excellent teaching capacity, who have since made their mark in many directions. Many of the junior graduates and a few of the undergraduates were also excellent teachers. But the great difference which strikes me in looking back is the gradual introduction of training . . . . . which has immensely improved the average teaching power of the high schools. At Poona I found that no attempt whatever was made to give any kind of physical training, except for the few boys who practiced gymnastics under a very feeble instructor. With the help of the staff I hired a small ground at which the boys could play *atya-patya* and *khokho*, but such games as cricket and football were beyond our means. When I went to Bombay, though a fine playground was available, I found that a small Parsi club with some old boys of the high school had been allowed to establish itself, and that boys in the school were not allowed to use the ground. I attempted a compromise, which naturally failed, and I had to order out the interlopers. I then arranged with the ready cooperation of my staff regular practice at cricket, and from that time onward games and drill have never flagged . . . . . At Poona I tried to get into touch with the parents, but found—an astonishing state of affairs which still subsists to a considerable extent—that quite young boys with only a smattering of English absolutely ruled the roost, and their parents humbly did as they were told. At Bombay I introduced conduct and progress registers which had to be signed by the parents once a month, and in this way, though I found a good deal of the Poona feeling here too, I was able to get at them to some extent; however they would rarely come to me except when their boys were 'detained,' on which occasions the boys probably thought it wise to produce them. Subsequent events have led to the strengthening of the hands of headmasters, and this, combined with invitations to sports and prize-givings, have brought headmasters and parents into much closer relations; there is however plenty of room for development in this direction . . . . . .

"In 1897 I became an Inspector, and I will survey the other classes of schools with which I then became acquainted. The numbers in attendance at Local Board schools have grown enormously, though for the first few years they were totally arrested or even diminished by plague. Municipal schools too have increased, but not in the same proportion. The salaries of masters have been gradually revised. When I first knew the schools Code promises were regarded in the vast majority of cases as only a pious hope not likely to be realized; whereas now-a-days the starting pay is actually given, and an appreciable

proportion rise to their full pay. Also, whereas untrained assistants had formerly to content themselves with Rs. 7, they *must* now get at least Rs. 9. The only drawback is that with the enormous number of new schools the number of untrained headmasters has risen out of proportion, and I have seen lads of only two years' service appointed as headmasters. Villagers find it hard to take such men seriously. Passing to the training colleges, the developments of the last 16 years have been enormous in the way of buildings; the curriculum remains very much as it was. Primary education amongst girls has made very little progress. Mr. Kirkham at the end of his time wrote of this, 'I can only say that I believe that respectable people do not now-a-days think it *very* wrong to send very little girls to school.' I fear that, except perhaps in the big centres of population, we have not got very much further since 1898. It is extremely difficult to get respectable women to take up the teaching profession ..... In the aided Anglo-Vernacular schools the staffs employed are better qualified than formerly, though even now very few appear even for the S. T. C. examination and, except in a few substantial schools, they are miserably paid and are turned away at each successive outbreak of plague .... Till 1902 I was also in charge of the European and English-teaching schools. The heads were invariably capable men and women, but the assistants were almost universally people of little or no academical qualification, and entirely innocent of training. Though it was like squeezing water out of a stone I used to urge matriculation and the S. T. C. examination as minimum qualifications. It seemed hard, but I believe the results have been good ... . For the benefit of Mahomedans and low castes I very early started scholarships under each Local Board which have produced a large number of 'passed' scholars. From the fact that in spite of this we find it difficult to get men to fill up vacancies in the Local Board and Urdu schools it is fair to infer that these men have readily found employment. With regard to Mahomedans in English schools I have been unable to notice any decided progress; the boys do very well as long as they are young, but later on they fall off and disappear .... A good deal has been done in the way of scholarships and hostels for the hill tribes during my time, and we are gradually getting a few lads as masters; but they suffer greatly from nostalgia, and revert to their ancestral ways with very little provocation. In the way of practical, technical education I have been able to trace very little real advance. Drawing, which had seemed to be catching on, has received a set-back by the insistence on algebra and geometry as compulsory subjects at the School Final examination .... I believe that the Advisory Committee will find most of the small technical schools absolutely useless and rotten."

102. During the year under report the clerical establishment of the Deputies' offices was revised; but owing to the opening of new schools and the number of educational schemes in progress the clerical work has increased so much that the additional help is regarded as only partial relief, and unless the establishment is still further strengthened the Assistant Deputies can hardly be relieved of the clerical work they have to do at present, so as to enable them to spend more time on their respective beats and to pay surprise visits to schools. If a return made by the Educational Inspector is correct, West Khándesh was the only district of the Central Division in which any attempt was made at repeated or surprise visits, 14 schools being revisited and 33 visited by surprise. In the Northern Division it is stated that "the inspecting officers paid as many surprise visits to schools as they could, and it has greatly helped to keep the teachers active and smart." In Sind the revision of the scale of pay of clerks is reported to have produced a good deal of confusion; the posts in the Inspector's office being on fixed pay, whilst those in the Deputies' offices were made incremental, a number of transfers became necessary, with the result that Mr. Hesketh now has only one clerk in his office who was there when he went on leave at the end of 1911, and that one of the most junior clerks.

103. With a lantern and slides borrowed from myself Mr. V. N. Ghate, an Assistant Deputy in the Poona district, gave 17 lantern lectures on Indian history and geography to masters and pupils of important Local Board and municipal schools. In the Surat district too a lantern has been found very useful; this together with 21 slides was supplied to the Deputy in 1911 by the District Local Board at a cost of Rs. 330. More are wanted.

104. **Departmental Examinations.**—The Vernacular Final was held in September, when the candidates increased from 7,180 (including 7 girls) to 7,602 (including 14 girls), and the passes from 3,657 (including 7 girls) to 3,820 (including 12 girls); the percentage of passes remained the same, *viz.*, 50. I notice that the percentage of success was 58 in Sind, 57 in the Central Division, and only 43 in the Northern Division and 45 in the Southern Division. In 1910 Mr. Wright raised an alarm as to the rapid increase in the number of candidates for this examination in Sind; Mr. Hesketh consequently made some enquiry into the matter, and

came to the conclusion that the supply did not to any great extent exceed the demand. At Lárkána for instance 336 men passed this examination in the three years 1909—11. Of these 130 are employed as schoolmasters, 68 are in the Revenue Department, 48 are distributed under the headings 'No service,' 'Dead,' or 'Professions,' and 90 cannot be traced. The School Final was held in November; the number of candidates decreased from 1,717 to 1,413, and the number of passes from 677 to 609; but the percentage of passes increased from 39·4 to 43. The decrease was due to the fact that the examination of 1911 was the last under the old syllabus, and consequently the number of candidates appearing in that year was abnormally large; the number in 1910 was 1,369. Under the new rules 91 candidates who had previously failed appeared again without further attendance; and 13 preferred to answer certain papers in the vernacular. At the Secondary Teachers' Certificate examination the candidates increased from 65 to 74, and the passes from 45 to 49. The Secondary Teachers' College diploma was secured by 31 candidates out of 32.

105. **Physical Education.**—There continue to be two aided gymnasia in Bombay, attended by 10 and 118 pupils respectively. Drill is taught in almost all schools where open space is available. In many various forms of gymnastics are also practised. In Sind a new cup called the Younghusband Cup, presented by Mr. K. H. Katrak, was competed for; it is to be held for one year by the school with the best all-round record at cricket, football, hockey, and athletics, and was won by the N. J. High School. There are the usual complaints that these competitions are not free from exhibitions of ill feeling and bad sportsmanship.

106. **Moral Education.**—Two handbooks of materials for moral lessons selected by the Hon'ble Mr. R. E. Enthoven, C.I.E., I. C. S., were issued from the Government Central Press in the course of the year, and the first of them is being translated into the four vernaculars for the use of teachers in primary schools. Both volumes are intended for the use of teachers only, and it is not proposed to place moral textbooks in the hands of the pupils. In January and February Mr. F. J. Gould, whose services had been borrowed from the Moral Education League of London, made a tour of the Presidency, holding public meetings at Bombay, Belgaum, Dhárwár, Poona, Karáchi, Hyderabad, Ahmedabad, Baroda, and Surat. At these meetings, which aroused much interest, he demonstrated the method of imparting direct moral instruction which he has made well known in England and America. His recommendations were considered by Government who issued orders upon them after the close of the year under report. The following is cited as a gratifying example of honesty at Belgaum; a Maratha boy aged 7, in the first standard, finding a sovereign on the road, picked it up and took it to his headmaster, who handed it over to the Mámlatdár.

107. **Teachers' Association.**—The Bombay Association had 6 life members and 105 ordinary members. During the year there were eight addresses or discussions; and a three days' conference was organized in February 1913, when a number of topics bearing on secondary education were discussed, including the need for educational museums.

108. **Students' Advisory Committee.**—In August 1912 Sir N. G. Chandavarkar was succeeded as President by the new Vice-Chancellor, Mr. Justice Heaton. Copies of the report of the Distressed Indian Students' Aid Committee were sent to persons considered likely to help, but no donations have been received by the local committee. It has been arranged to forward every six months to Mr. Mallet, the secretary for Indian students, a list of those recommended to him during the previous half-year, so that he may keep the committee informed of the arrangements made for them and of the courses they follow. Every Indian student who desires to be admitted to the Bar in London has now to apply in the first instance to the committee, and to bring to them testimonials of good character from his tutors, and a certificate of character and standing signed by responsible persons known to the committee; these certificates, if approved, are forwarded to Mr. Mallet together with such supplementary information as can be gathered, and he, if satisfied, gives a certificate which the Inns of Court require. The number of students who applied in writing for information increased from 200 to 207, while the number of personal enquiries was 161. The number of students who went to England with the knowledge of the committee

was 26; of these 5 went for the Indian Civil Service, 8 for the Bar, 1 for engineering, 2 for the Oxford and 6 for the Cambridge degree, 3 for medical degrees, and 1 for general education. The number of those who expressed their willingness to be under Mr. Mallet's guardianship was seven.

109. **Books and Vernacular Literature.**—During the year the new Sixth and Seventh Readers in Sindhi were published; and new editions of Maráthi Primer and Book VI, Gujaráti Primer and Books I (boys'), I (girls'), and IV, Kánarese II, IV, V, and Sindhi II. The question of a reduction in the price of the Primer was finally decided by Government in August 1911, and the Maráthi and Gujaráti Primers were consequently issued in the year under report at the reduced price of an anna and a half, the coloured illustrations being replaced by others in black and white. Of the girls' readers Maráthi I had gone to the press, and II was under scrutiny at the end of the year; Kánarese I was not ready, and the preparation of all the others was suspended owing to the dearth of girls at school in the higher standards.

110. The annual statement of the Sind Book Depôt is printed in the supplement; the sale proceeds rose from Rs. 16,757 to 18,444, and there was a closing balance of Rs. 12,305. For some time past Mr. Hesketh has been conducting an investigation into the working of this institution, the accounts of which were also examined by Messrs. Fergusson and Co., and he has recently submitted an exhaustive report upon it. His main results are:—

1. The stock printed or purchased during the last 12 years has actually realized very nearly its full nominal value or selling price, *viz.*, Rs. 143 for stock costing 100.
2. The profit for the six years ending 1906-07 averaged about Rs. 1,600, but for the six years ending 1912-13 less than Rs. 300.
3. The possible profit is decreasing, as fewer books are being printed and more are being purchased.
4. There appears to be a falling off in the total amount of business done by the Depôt.
5. If the Depôt is to work at a profit, the sale proceeds must not fall below Rs. 18,500. It would probably be safer to put this figure at Rs. 20,000 owing to the tendency of the selling price to fall.

111. The Maráthi Book Committee considered 16 books during the year; the Vice-Principal of the Poona Training College revised 3 and reported on 55. The Gujaráti Committee had 98 books before it, and reported on 84, including 19 of the preceding year; the Ahmedabad Vice-Principal revised 5 and reported on 84. The Kánarese Committee had 57 books before it, but only disposed of 6; proposals for the reconstitution of this committee have been submitted. The Dhárwár Vice-Principal revised 4 and reported on 53. The Principal of the Hyderabad Training College revised 11 books and reported on 24.

112. A meeting of the Sind Vernacular Literature Committee was held in February 1913 to settle the orthography, transliteration, and use of Sindhi words about which there was a difference of opinion and practice, and certain definite conclusions were arrived at. The Deccan Vernacular Translation Society rewarded 26 books and rejected 15, leaving 25 to be disposed of. Lectures were delivered as usual in connection with the Sassoon Mechanics' Institute and the Dnyan Prasarak Mandali, both of which receive grants. The whole allotment of Rs. 7,200 for the encouragement of literature was expended. The expenditure from the Dakshina Fund was as follows:—

	Rs.
Rewards to authors	3,387
Allowances to Fellows	16,000
Contributions to Boarding-houses, Training Colleges for Men, Poona and Dhárwár	1,296
Total ...	20,683

113. **Libraries.**—The total number of libraries registered in this office under the new rules up to July 31, 1913, was 216, of which 64 were in the Central Division, 67 in the Northern, 66 in the Southern, and 19 in Sind.

114. **Donations.**—Donations amounting to Rs. 2,000 or upwards were made in the Surat district by certain Parsi and Hindu gentlemen for the construction of primary school houses for boys and girls in villages. A sum of Rs. 2,400 was given as an endowment by Messrs. Maganlal and Chhotalal Balkishandas Kazi for a monthly scholarship of Rs. 6 for four years to be given to a Dasha Lad Bania student passing standard III and prosecuting his studies further in the Sorabji J. J. high school, Surat. An endowment of Rs. 4,000 was given by the late Mr. S. D. Ovalekar of Thána to found a scholarship of Rs. 10 per mensem for a student passing the matriculation with the highest number of marks from the B. J. high school, Thána, and continuing in some Arts College for four years. In Sind Mr. K. H. Katrak presented Rs. 500 to found a prize in the name of Mr. A. D. Younghusband, to be awarded to the Parsi boy or girl in Sind passing highest at the matriculation each year.

115. **Plague.**—The Central Division enjoyed comparative immunity, and on the 31st March 1913 only 15 schools (with 1,190 pupils) were closed on this account; one teacher and 114 pupils fell victims to it. In the Southern Division also plague was much less in evidence than in the preceding year; but 13 teachers and 444 students in primary schools died of it, and also 4 boys in the Belgaum high school. At the end of the year 61 schools (with 4,285 pupils) were closed on this account. In Káthiáwád one teacher and 68 pupils are reported to have died of it. In Karáchi only 19 pupils died of plague.

116. **General Table IX.**—In paragraph 16 I have pointed out in connection with secondary schools what appears to me the misleading character of this Table. Both of the terms "trained" and "untrained" require definition. In the case of primary schools "trained" presumably includes all those who hold a training college certificate, whether acquired by actual attendance at a training college, or by appearing for one of its examinations, or given as an act of grace as a reward for service of a certain length and approved quality; but if there is any objection to the inclusion of all these, the exact sense in which "trained" is to be used should be defined. In the case of middle and high schools it should be laid down precisely whether "trained" is to be limited to those who have passed successfully through a definite course of training at some recognized "normal" institution, or whether it is also to include the holders of certificates such as our Secondary Teacher's Certificate, earned by a written examination and the giving of a lesson before the inspecting officer. It should also be laid down whether "untrained" is to include all the others whatever, or only those who are eligible for training in the sense defined. If the former (which is the course followed at present), the Table ceases to be of much practical value, as, even if in course of time all ordinary assistants come to be trained, the Table will still show a number of untrained, *viz.*, the shastris, drawing-masters, gymnasts, etc., who cannot be trained in the same sense. The same applies to the headings "Possessed of a University degree" and "No degree". At present for the Government secondary schools we recruit none but graduates for ordinary posts; yet we shall never be able to get rid of the second heading, as there will always be these shastris and others who cannot, in the nature of things, be graduates. If then the Table is to show from year to year the progress made in the way of recruiting only trained and graduate masters, these four headings should be limited to those who are capable of being trained graduates, *viz.*, the headmasters and ordinary assistants; and if it is desired to enumerate the rest, a new head for "Others" should be opened, for those who are neither trained nor untrained, neither graduates nor non-graduates. Lastly, the application of the "trained" distinction to colleges is absurd. It will be noticed that in Government Arts Colleges there are stated to be two trained teachers; these are two school-masters, holding the Secondary Teacher's Certificate, who happen to be serving as assistants to two professors, whilst the professors themselves, including first-classes of Oxford, wranglers of Cambridge, and distinguished Indian graduates, all go down as "untrained". The arrangements for training primary and secondary teachers obviously do not apply to colleges, and this part of the Table might well be left blank.

117. **Supplementary Tables.**—The six Subsidiary Forms giving full details of Colleges and all kinds of schools have been printed in the supplement to this Report.

VII.—GENERAL SUMMARY.

118. The following statement gives the attendance returns for the last two years :—

Class of Institutions.	Number of Institutions.		Number of pupils.	
	1911-12.	1912-13.	1911-12.	1912-13.
Public Institutions.				
University Education—				
Arts Colleges	11	11	3,719	3,941
Professional Colleges	4	4	1,239	1,278
School Education, General—				
Secondary Schools	559	588	74,601	80,144
Primary Schools	12,763	13,368	757,130	814,409
School Education, Special—				
Training Schools	39	34	1,708	1,910
Other Schools	52	95	3,912	5,145
Total, Public Institutions ...	13,428	14,100	842,309	906,827
Advanced	132	183	4,073	6,600
Elementary, etc.	2,900	2,837	76,495	74,258
Total, Private Institutions ...	3,032	3,020	80,568	80,858
Grand Total ...	16,460	17,120	922,877	987,685

This table shows an increase of 660 in the number of institutions and of 64,808 in the number of pupils. In public institutions, that is to say, those under Government inspection, the number of male pupils increased from 707,328 to 761,435 and the number of female pupils from 134,981 to 145,392. The average monthly number on the rolls increased from 824,438 to 880,665; and the average daily attendance from 628,457 to 678,713. The ratio of the average daily attendance to the average monthly number rose from 76·2 to 77·1. The percentage of all pupils under instruction to the general population has risen from 3·3 to 3·6.

119. The schools closed on account of plague on March 31st, 1913, and the pupils belonging to them at the time they were closed were 96 and 6,938 respectively against 377 and 25,510 in the preceding year. A comparative table giving detailed information is printed in the Supplement.

120. General Table III gives full details as to the attendance in the different classes of public schools and the figures contrast with those of the previous year as under :—

	Number of Schools.		Number of Pupils.		Schools.		Pupils.	
	1911-12.	1912-13.	1911-12.	1912-13.	Increase.	Decrease.	Increase.	Decrease.
Government ...	82	81	15,410	16,626	...	1	1,216	...
Local Board ...	6,617	7,005	356,185	388,338	388	...	32,153	...
Municipal ...	1,039	1,076	120,402	136,740	37	...	16,338	...
Native State ...	2,857	2,902	182,129	185,214	45	...	3,085	...
Aided ...	2,584	2,682	147,326	155,578	98	...	8,252	...
Unaided ...	249	354	20,857	24,331	105	...	3,474	...
Total ...	13,428	14,100	842,309	906,827	673	1	64,518	...

The Gujarát College at Ahmedabad having come under the control of Government, the number of Government colleges increased by one, but the number of normal classes fell from 19 to 17. Thus there was a decrease by one in the total number of Government institutions in the year under report. Other variations in the number of schools and scholars have been noticed in their proper places.

121. The results of public examinations will be found in General Table VI and the stages of instruction in schools for general education are shown in General Table V. The number of pupils learning English has increased from 84,651 to 87,139 and the number learning a vernacular language from 811,633 to 874,231; the number learning a classical language has decreased from 44,959 to 44,360.

122. The distribution of the pupils in public institutions according to race is given below :—

Years.	Europeans and Anglo-Indians.	Indian Christians.	Hindus.		Mahomedans.	Buddhists.	Parsis.	Others.	Total.
			Brahmins.	Non-Brahmins.					
1911-12 ...	4,811	18,782	120,010	540,262	126,464	...	16,432	2,548	842,309
1912-13 ...	4,495	20,064	129,248	585,325	147,958	...	16,539	3,198	906,827

Out of 58,325 the total number of Hindus (non-Brahmins) there were 59,561 Lingayat pupils in all classes of public institutions, *viz.*, 52 in Colleges, 1,131 in secondary schools, 58,268 in primary schools, and 110 in special schools.

123. The table showing the distribution of schools throughout the Presidency is printed in the Supplement. The following table gives, in brief, information for the British Districts and Native States :—

	Area in square miles.	Number of towns and inhabited villages.	Estimate of population.	Number of public institutions.	Number of pupils on 31st March 1913.	Private institutions.	Pupils in such schools.	Percentage of total pupils to population.	Number of villages with schools.	Average number of square miles to each village with a school.
British Districts ...	123,620	23,654	19,083,240	10,008	708,191	2,207	49,903	3·8	8,947	13·7
Native States ...	69,758	14,961	7,404,538	3,193	188,656	613	26,966	3·1	2,762	22·8

124. The total expenditure from all sources is given in General Tables II and IV, and the figures contrast with those of the previous year as under :—

Years.	Provincial Funds.	Local Funds.	Municipal Funds.	Fees.	All other sources.	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1911-12 ...	53,98,480	10,75,894	10,13,765	26,27,182	35,02,206	1,36,17,527
1912-13 ...	68,82,283	11,62,254	9,84,936	26,35,608	36,82,624	1,53,47,705

125. Various percentages are worked out in General Table II, and the total expenditure of the year is divided between the different funds as under :—

	Provincial Funds.	Local Funds.	Municipal Funds.	Fees.	Revenue of Native States.	All other sources.
Percentage for British Districts ...	51	8·6	7·3	17·5	0·1	15·2
Percentage for the whole Presidency	44·8	7·5	6·4	17·1	2·9	14

126. The share which each class of institution has in the total expenditure is as under :—

Years.	Cost of public institutions classed as							Total.
	Government.	Local Board.	Municipal Board.	Native States.	Aided.	Unaided.	General.	
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1911-12	22,34,007	29,55,401	14,78,491	16,38,699	33,88,292	5,41,599	14,71,068	1,36,17,527
1912-13	27,21,004	31,97,157	16,84,209	16,48,303	39,63,151	6,07,481	15,26,360	1,53,47,705

and again—

Years.	Arts Colleges.	Professional Colleges.	Secondary Schools.	Primary Schools.	Special Schools.	Buildings and Apparatus.	University.	Direction and Inspection.	Scholarships.	Miscellaneous.	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1911-12 ...	3,54,933	4,18,212	30,53,796	58,07,261	6,76,662	13,86,265	2,67,618	6,90,752	2,16,909	4,04,219	1,36,17,527
1912-13 ...	6,15,884	5,60,371	33,14,109	62,87,203	11,09,168	19,93,560	2,18,776	5,96,357	2,18,330	4,90,807	1,53,47,705

127. The following table compares the net expenditure from Provincial Funds for the last two years :—

			1911-12.	1912-13.
			Rs.	Rs.
University Education	...	Arts Colleges ...	1,46,911	1,94,783
		Professional Colleges ...	2,70,100	3,42,763
School Education, General	...	Secondary Schools ...	5,91,274	6,64,733
		Primary Schools ...	22,83,380	26,75,320
		Training Schools ...	2,05,319	2,30,780
Do. Special	...	Medical Schools ...	42,117	61,389
		Other Special Schools ...	2,55,188	3,20,830
Buildings and Apparatus		... ...	9,00,909	12,96,688
University		... ...	10,000	2,55,000
Direction and Inspection		... ...	5,09,408	5,07,834
Scholarships		... ...	90,336	58,700
Miscellaneous		... ...	1,23,538	1,63,263
		Total ...	53,98,480	68,82,283

From the above table it will be seen that the expenditure from Provincial Funds rose from Rs. 53,98,480 to Rs. 68,82,283. This increase is mostly due to the following additional grants expended in 1912-13 :—

Imperial Grants.

(*a*) Rs. 1,97,829 were spent on school buildings out of the non-recurring grant of Rs. 11,02,000.

(*b*) Rs. 79,750 were spent on Government High School hostels out of the non-recurring grant of Rs. 3,00,000.

(*c*) Rs. 2,32,405 were spent out of the Darbár grant of Rs. 6,70,000 on grants to Municipalities, increasing the output of training colleges, girls' education, European education, etc.

(*d*) Rs. 60,000 were spent on grants-in-aid to secondary schools.

(*e*) Rs. 3,45,000 were transferred to the Bombay University for development.

Provincial Grants.

(*f*) Rs. 1,55,959 were spent on opening new schools, and improving the pay of teachers.

The rest of the increase is mainly due to the large expenditure incurred by the Public Works Department on Government educational buildings and to the general increase under all heads.

128. Government are aware that the attempt made in 1911 to curtail the length of this report was much resented by the public, and have directed that nothing of interest or importance should be omitted. Government have also directed in numerous resolutions issued from time to time that certain matters should be referred to in the annual report. Hence it has not been found possible to limit this year's report to the twenty pages prescribed by the Government of India.

W. H. SHARP,
Director of Public Instruction.

Poona, 30th September 1913.

APPENDICES.

EDUCATION—GENERAL TABLE I.

GOVERNMENT OF INDIA.

Abstract Return of Colleges, Schools and Scholars in the Bombay Presidency at the end of the official year 1912-1913.

(For details see General Tables III.)

AREA AND POPULATION.				PUBLIC INSTITUTIONS.							PRIVATE INSTITUTIONS.			
				COLLEGIATE EDUCATION.		SCHOOL EDUCATION, GENERAL.		SCHOOL EDUCATION, SPECIAL.

* The percentages required for 2 (a), 2 (b), 2 (c) are calculated from the figures given in columns 8a, 8b, 8c, respectively, of General Table IV.

† The annual cost is calculated on the *direct* expenditure only. The average cost of educating each pupil is obtained by dividing the direct expenditure by the average number on the rolls monthly during the year.

‡ The average cost of each pupil in Local Fund and Municipal Schools is to be obtained from the figures given in General Table VII.

§ Fractions of a rupee should be omitted, except in the columns showing the average annual cost of educating each pupil.

BOMBAY: PRINTED AT THE GOVERNMENT CENTRAL PRESS.

Administration Reports—

Report of the Director of Public Instruction on the progress of education in the Bombay Presidency during the year 1912-13.

No. 258.

EDUCATIONAL DEPARTMENT.

Bombay Castle, 21st January, 1914.

Government memorandum to the Director of Public Instruction, No. 3214, dated the 1st November, 1913.

Letter from the Director of Public Instruction, No. 8934, dated the 5th November, 1913:—

"With reference to Government memorandum No. 3214, dated the 1st November, 1913, I have the honour to state that the Superintendent, Government Central Press, Bombay, has this day been asked to hand over at once in the Secretariat seven advance copies of the Director of Public Instruction's Annual Report for the year 1912-13."

RESOLUTION.—The present report submitted by the Director of Public Instruction relates to the first year of a new quinquennium. In the Resolution dealing with the preceding report, which was a quinquennial one, Government reviewed exhaustively the educational progress made during the period under reference and the state of education in its several branches subsisting in this Presidency at its close. An indication was also given of the various educational measures and schemes which were then in contemplation or approaching realization. In these circumstances the Governor in Council does not propose to do more than note briefly the advance made during the year and touch on such points of special interest as emerge from the report now before him.

General results.

2. The total number of educational institutions of all kinds in the Bombay Presidency rose during the year under review from 16,460 to 17,120, with an increase from 9,22,877 to 9,87,685 in the number of persons undergoing instruction in them. The former increase is chiefly perceptible in the case of primary schools, the number of which rose by nearly 600 to a total of 13,368, the attendance at them aggregating 8,14,409 as against a previous total of 7,57,130. Turning to the subject of finance it is observed that out of the increase of 17 lakhs in the total expenditure on public instruction incurred during the year from all sources, provincial revenues, supplemented to the extent of some 9 lakhs by imperial assignments, contributed 15 lakhs, and local funds nearly a lakh; municipal expenditure, on the other hand, showed a slight decline. Of the total provincial expenditure for the year, amounting to 69 lakhs, nearly 27 lakhs, exclusive of the charges on account of direction and inspection, were spent on primary education, the increase over the previous year's expenditure under this head being a little short of 4 lakhs.

Arts Colleges.

3. It is satisfactory to note that the majority of the Arts colleges made efforts to respond adequately to the demand for increased teaching staff imposed upon them by the new courses, but it is nevertheless evident that, with classes of the excessive dimensions reported in the case of two of the aided colleges, the need for further improvement in this direction is insistent. The attendance at most of the colleges exhibited an increase, the Elphinstone, where the number of students on the roll fell by 80, being a signal exception. Having regard, however, to the causes which led to it, and to the desirability of adapting the numbers to the limited accommodation available, this result may be regarded as not altogether unsatisfactory. The college is to be congratulated on its high proportion of successes in the B. A. Examination.

A noteworthy event was the opening of the Madhavlal Ranchhodlal Institute in connection with the Gujarat College for the teaching of Science.

Several of the aided colleges have carried out important additions or extensions to their buildings, notably the Fergusson with its fine amphitheatre and the Wilson with its excellently planned hostel.

Expenditure on secondary schools.

4. The extra expenditure incurred during the year for the improvement of secondary education has been considerable. Provision to the extent of 3 lakhs was made for building extensions, while a sum of Rs 32,000 was allotted as a first step in the scheme for the general improvement of the pay of assistant masters, and 1 lakh was distributed among aided schools for both Indians and Europeans in the form of supplementary grants. Finally, the raising of school fees, to the beneficial effect of which in the case of aided schools the head master of the Surat high school draws attention, has, without prejudicially affecting the attendance, secured an additional half-lakh of revenue which will be regularly devoted to the amelioration of Government secondary schools.

Certain points relating to secondary schools.

5. The Director presents an interesting analysis of the figures which furnish the basis for calculating the proportion of trained teachers in secondary schools, and the conclusion to which it leads, namely, that, excluding those teachers to whom the term "trained" is not properly applicable and investing that term with a wider and more practical significance, this proportion, in Government schools, is 73 per cent., places the present state of affairs in a truer and at the same time more encouraging light than is the case with the bare statistics supplied in the tabular appendix. With the Hon'ble Mr. Sharp's endorsement of Mr. Lory's observations as to the importance of attaching recreation rooms and libraries to high school hostels Government are in entire agreement, and they hope that the proposals which will in due course be submitted for the disbursement of the imperial grant allotted to educational hygiene and other cognate objects will take account of these desiderata.

Prize distributions and games at high schools.

6. The report contains a summary of the work done during the year by the several Government high schools, and, although this additional matter has appreciably increased its length, the Governor in Council is of opinion that, apart from the very real interest of the information thus furnished, its inclusion is likely to serve a useful purpose in other directions also. Government are pleased to note that the prize distributions of the high schools at Ahmedabad, Godhra, Nadiad, Dhulia, Satara and Karwar were presided over by either the Commissioner or the Collector. They consider that the presence of these officers at such gatherings cannot fail to have a good effect in the direction of promoting a healthy *esprit de corps* and of arousing a living interest in the schools. The Sholapur high school, the buildings of which were extended during the year at a cost of Rs. 40,000, and the Hyderabad high school are reported to have been frequently visited, and parents' gatherings were held at Nadiad and Broach. Particularly to be commended is the institution of a Past *vs.* Present cricket match at the last-named school. Among the high schools at which games are keenly taken up those at Ahmedabad, Godhra, Poona, Belgaum and Bijapur may be more specially mentioned. At Dharwar and Karwar new playgrounds have been acquired, while the play-grounds of the Satara and Belgaum high schools have been extended and improved.

Other developments in connexion with high schools.

7. The Governor in Council notes certain other commendable innovations in connexion with secondary education. Lectures by professional men were delivered on medical subjects at the Elphinstone and the Ahmedabad high schools, and on general subjects by gentlemen of the town at the Belgaum school. The urgent need of the medical inspection of school children, a scheme for which has recently been submitted to the Government of India, is exemplified by the fact that the Assistant Surgeon who examined the eyesight of the pupils of the Nadiad high school found that only 109 out of 285 boys possessed normal vision. At Belgaum a move in somewhat the same direction was made by the institution of a record of the body measurements of the pupils. At Nadiad, Godhra and Shikarpur special attention was devoted to the use of the school library, and at the first-named place the public library set apart for the use of the boys such books as were considered specially suitable. It is hoped that steps will be taken at an early date to

remedy the defects noted in the equipment of the Karachi school and in the buildings of the Hyderabad school.

Aided Anglo-vernacular schools.

8. On all sides it is apparent that the progress of aided high and middle schools is seriously impeded by the extreme dearth of efficient instructors, which even the liberal supplementary grants now available for giving increased remuneration will fail to meet. The only satisfactory solution of the difficulty, and one which has for some time been under the consideration of Government, appears to be the institution of a general State-aided provident fund which will afford strong inducements to teachers to remain in the same employment instead of constantly migrating from one school to another or abandoning the teaching profession altogether; but concurrently with such a scheme are needed largely increased facilities for the training of teachers and these can only be provided gradually.

European and English-teaching schools.

9. In the case of schools for Europeans and Anglo-Indians the same difficulty appears, though in a lesser degree owing to the supply of missionary teachers which is available for them; but here the situation is complicated by the poverty of a large section of the community and the consequent necessity of making special provision for the children of poor or destitute parents. The grant of Rs. 40,000 recently allotted to this branch of education was easily absorbed, and left many urgent requirements still unprovided for. With regard to what are technically known as English-teaching schools, which give instruction to some eight thousand pupils, the Governor in Council agrees with the Inspector in regarding it as unfortunate that they should attract so considerable a proportion of Indian pupils to whose needs they are not properly suited. The revision of the curriculum prescribed for these schools appears to be desirable and should be taken into consideration.

Primary Education—General results.

10. Turning to primary education, it is observed that 387 new local board schools were opened during the year, the great majority being in the Central Division. As was indicated last year there are signs that the process of multiplying primary schools, the results of which have been the creation of nearly 1,900 additional schools within the last four years, has in most parts of the Presidency, for the time being, overtaken the effective demand for these institutions, and that in considering requests for the opening of further new schools it will be necessary to avoid mistaking the wishes and convenience of a few individual residents for a general desire in the locality for increased educational facilities. The bulk of the fresh expenditure is therefore properly being concentrated on the improvement of existing facilities. One lakh was appropriated for the purpose of raising the pay of trained masters in local board schools, while the untrained masters in Sind received an allotment of Rs. 6,500. The Director points to the ultimate necessity of improving the prospects of this class in the Presidency proper also.

Primary school buildings.

11. The problem of providing accommodation for local board schools, of which only some 38 per cent. are at present housed in buildings of their own, continues to receive general attention, and the report describes several experiments, of varying promise and success, undertaken with a view to its solution. Government have recently directed that a rudimentary and inexpensive type of rural school building, which has been successfully adopted in Ceylon, should be tried in selected localities. They observe with satisfaction the beginnings of a movement, notably in the Poona and East Khandesh districts, in the direction of the provision of school-houses by individual or corporate acts of munificence. By the development of this movement and by the system of free grants which the recent imperial assignments have rendered possible, it is hoped that some substantial progress may be made towards the suitable housing of all primary schools.

Developments in connexion with primary education.

12. Among new developments in connexion with primary education may be noted the raising by Rs. 1,30,000 of the Government educational grant to municipalities, the completion of the revision of the curriculum in nearly all the languages

of the Presidency, the payment by certain municipalities of the full code pay to trained teachers on their staff, the inauguration of an experiment in the holding of the upper classes of a school in the morning and the lower classes in the afternoon, the holding of conferences of masters under the presidency of inspecting officers, the regular administration of quinine to school children in certain malarial tracts, and, lastly, the endowment by a private person of a local board school for the purpose of exempting its pupils from all fees without incidental loss to local funds. It is interesting to note that during the year more than one-third of the pupils in the local board schools of the Northern Division received their education entirely free.

Mahomedan education.

13. With regard to Mahomedan education the Governor in Council has perused with interest the summary of the results of the work of the Special Mahomedan Deputy in the Southern Division which include an increase within the last four years from eight to fourteen thousand in the number of children attending special schools and classes for Mahomedans, and from 76 to 170 in that of pupils passing the Vernacular Final Examination. The comparative statistics of literacy among Hindus and Mahomedans collected by Mr. Hesketh are instructive, but, having regard to the predominantly urban character of the Mahomedans in the Presidency proper, it would be a mistake to regard with any measure of complacency the fact that, from the purely numerical point of view, that community is considerably the more literate of the two. Where, as in Sind, the characteristics of these two communities are reversed, the educational backwardness of the Mahomedans at once becomes apparent. At the same time Mr. Hesketh's observations with regard to the state of Mahomedan education in that province indicate that the community is making serious efforts to recover lost ground, and it is encouraging to see that within the last decade the number of Musalman students at the Dayaram Jethmal College has risen from 8 to 29, and that the Mahomedan attendance at the high schools has risen this year from 705 to 804. The Governor in Council has approved the proposal that a special Mahomedan Deputy should be appointed to deal with Mulla schools in Sind and to promote the cause of education generally among the rural Mahomedan population of the province. He awaits with interest the recommendations of the committee recently appointed to consider the whole question of Mahomedan education.

Training institutions.

14. The proposals for extending the scope of the Secondary Training College, called for last year, are now before Government. As regards the Vernacular Training Colleges arrangements have been sanctioned, at an annual cost of nearly Rs. 1,38,000, for an increase of the yearly output of trained male teachers by 146, and of female teachers by 38. Concurrently, the local normal classes instituted experimentally in 1910-11 are being continued for a further period. There will thus be a substantial yearly accretion to the ranks of fully and partially trained teachers in primary schools. As the Hon'ble Mr. Sharp points out, however, advance in this direction must be cautious in view of the heavy ultimate financial responsibilities which are being incurred. The percentage of trained teachers, both male and female, in primary schools is now 33·1.

Technical education.

15. With regard to technical education the two important sets of proposals referred to in last year's review, namely, the re-organization of the system of inspection and examination of drawing in schools and the constitution of a central authority for the control of technical schools, have been sanctioned. The latter scheme involves a very considerable development of the Victoria Jubilee Technical Institute and its elevation into a central technological institute for the whole Presidency. A third proposal for the introduction of manual training in schools has also received sanction, and, as soon as the requisite number of instructors have been trained, 'Sloyd' classes will be opened in selected schools and at the Vernacular Training Colleges.

Miscellaneous.

16. Notice has separately been published of the action taken by Government in respect of moral education and further comment is for the moment premature. Since the close of the year under review steps have been taken at

Poona, under the guidance of Mr. Wren, towards imparting some knowledge of hygiene as an adjunct of bodily training. It is satisfactory to observe the increase in the membership of the Teachers Association, and Government are aware that the proceedings at the conference which was held in February were of much interest and of distinct value.

Administration.

17. During the year fourteen new posts of Assistant Deputy were created and the clerical establishments of the Deputies' offices were revised. As a result of these changes the Deputies will in great measure be relieved of the burden of office work and purely routine duties, and will enjoy more extended opportunities of devoting themselves to the higher task of keeping themselves closely in touch with the work and needs of the schools in their charges and of affording assistance and guidance to the teaching staff.

18. The acknowledgments of Government are due to the unremitting and devoted zeal displayed during the past year by the Hon'ble Mr. Sharp in the administration of the Department in his charge. The increase of work of the Department has been so great that, since its close, the appointment of a Deputy Director has become necessary. This increase has entailed heavy additional labour on every member of the Department whether in the administrative or in the teaching branches, and the Governor in Council desires to record his appreciation of the energy generally displayed in grappling with new conditions and added difficulties.

J. L. RIEU,
Secretary to Government.
